Arrowhead Clinic in Atlanta Explains Whiplash Injury Treatment Options for Car Accident Victims

May 05, 2021

ATLANTA, GA - May 05, 2021 -

Arrowhead Clinic in Atlanta has recently posted a blog post about the treatment of whiplash injuries after a car accident. The blog post can be read here: https://www.arrowheadclinic.com/atlanta/how-do-chiropractors-treat-whiplash-injuries. Dr. Summer Turner, an Atlanta whiplash chiropractor, specializes in the treatment of accident injuries, including whiplash. The car accident doctor in Atlanta explains whiplash as a soft tissue injury that damages the tendons, muscles, and ligaments of the neck. Without timely treatment, whiplash may result in complications and take much longer to heal. A whiplash chiropractor is the right person to diagnose the injury and provide customized treatment options.

The top whiplash chiropractor in Atlanta stresses the importance of chiropractic treatment for whiplash injury without the need for pain medications or surgery. An experienced chiropractor in Atlanta is dedicated to patient care and focuses on a full recovery.

Dr. Turner outlines the need for plenty of rest during the initial phase of the treatment. Depending on the accident victim?s condition, the chiropractor in Atlanta may recommend low-impact aerobic activities to keep

them active without stressing too much. In a previous press release, Arrowhead Clinic Chiropractor Atlanta advises people not to let whiplash injuries go untreated.

The best Atlanta whiplash chiropractor is a specialist in spinal adjustments and focuses on improving mobility, reducing pain, and enhancing healing. ?Adjustments can be done manually or by using adjusting instruments depending on your individual needs,? says Dr. Turner. Corrective spinal rehabilitation is another form of chiropractic adjustment to reduce stress on the spinal cord, achieve spinal correction, and improve health. Spinal decompression is one popular form of chiropractic manipulation to restore the range of motion.

The whiplash chiropractor advises victims to consult with the top car accident doctor before starting with any exercise regimen to prevent the risk of injury. According to Dr. Turner, ?Just because you aren't experiencing any symptoms does not mean you've made a complete recovery. It takes careful consideration and monitoring from your chiropractor to determine when a patient makes a complete recovery to avoid the return of symptoms or future problems." The Atlanta chiropractor also suggests consulting with a personal injury lawyer to recover the cost of injuries if someone else was responsible for the accident.

Whiplash injury victims can schedule a free consultation with the top chiropractors at Arrowhead Clinic in Atlanta. Chiropractic care is the first line of defense against chronic pain and injuries caused by whiplash. Timely treatment is necessary to present the aggravation of injuries. The earlier the injuries are diagnosed, the sooner the treatment can begin and the quicker the recovery. Arrowhead Clinic works with the victim?s insurance provider and provides them with the necessary medical documentation. Top whiplash chiropractors in Atlanta are available for a free accident injury consultation at 770-961-7246.
