

Predator Lures And Baits Available Through New Website

September 28, 2015

September 28, 2015 - PRESSADVANTAGE -

Bozeman, MT based hunter and trapper supplies company, Predator Lures, has announced the launch of their new website. Their different lure packs for predatory animals can now be found online for direct purchase. At present, they have three different lure packs, but it is expected that more will be added soon. Full details can be found on the company's website at <http://predatorlures.com/products/>.

"We want to make sure hunters and trappers across the country have the highest quality lures available to them," says Esai Cervantez from Predator Lures. "While hunting and trapping is, obviously, a very 'hands on' activity, the world is becoming increasingly digital. As such, we have decided to take our store online as well."

The company was founded in 2012 and their Bozeman, Montana store has been very popular since then. It is a division of Old Cy's, LLC. In 2012, Predator Lures developed the 'Bring 'em in Formula', which is a unique wildlife attractant line. The product is 100% made in Montana and eco-friendly, which has always attracted customers.

The team at Predator Lures has always been committed to providing more enjoyment for outdoor sportsmen

and enthusiasts. They came together and felt that it was time to join the 21st century and go online. Not only have they launched their new website, but they have also launched their Facebook page on <https://www.facebook.com/Predator-Lures-852159984864432>. As a result, trappers and hunters from all over the country can now enjoy their products.

The Facebook page in particular is also an opportunity for enthusiasts from all over the country to come together and discuss their experiences with the sports and the Bring 'em in Formula. "I am from Ontario," says Peter Filch. "I used to get friends in Montana to bring me some lure every year before the season. Now that I can order it online, I will be able to go trapping much more often. The lure is the best I have ever come across, attracting wildlife near and far with its powerful scent. And, through Facebook, I have even met some new trappers who also use the product."
