

Family Dentist in Addison TX Launches New Website

May 14, 2021

Addison, Texas - May 14, 2021 - PRESSADVANTAGE -

Addison Family Dentistry, a dental office in Addison, TX, is happy to announce that they have recently launched their new website. This practice is lead by the husband-and-wife team of Dr. Adrian De Vincenzo and Dr. Sara Saremi, who ensure that the service they provide is personalized for each patient. Being a family dentistry practice, they are capable of handling the dental needs of every member of the family, especially the children. They always strive to be gentle and patient when kids have their first dental appointment. More about this can be gleaned from their website at addisontxfamilydentistry.com.

A representative for Addison Family Dentistry says, "We are excited to launch our new website. And with this new website, our site visitors will find it easier find what they are looking for. Furthermore, our site is now mobile responsive, which means that it will always be displayed correctly in any computer device, including tablets and smartphones."

Addison Family Dentistry offers preventive dentistry, checkups and cleanings, restorative dentistry, children's dentistry, periodontal therapy, porcelain crowns, dentures and partials, root canal therapy, dental extractions, dental implants, cosmetic dentistry, porcelain veneers, teeth whitening, Invisalign clear braces, metal-free crowns, sedation dentistry, and advanced dentistry.

The dentists at Addison Family Dentistry place a lot of importance on preventive dentistry because it serves as the foundation of quality dentistry. As always, prevention is better than cure and thus, they want to help patients of all ages to be able to maintain their best smiles through regular professional checkups, cleanings, customized nightguards, and other similar services that may help in minimizing the possibility of tooth damage and decay over the years.

Dr. De Vincenzo or Dr. Saremi will conduct a detailed screening for patients who come for checkups and cleanings. They will examine the patient's natural tooth structures, current restorations, gum tissue, and bite. They will then inform the patient of any symptoms of dental problems that need to be treated. Next, their experienced hygienist will provide a detailed cleaning to eliminate harmful bacteria, including tartar and plaque and tartar. More about dental checkups and cleanings can be gleaned from www.addisontxfamilydentistry.com.

In addition to detecting dental issues, Addison Family Dentistry also provides oral cancer screenings. It is essential to catch oral cancer early, which is why they provide screenings during patients' routine checkups. It is also important to note that 25 percent of oral cancer cases have been found to occur even in people who had no known risk factors.

Meanwhile, Addison Family Dentistry provides various dental services for kids, including dental checkups and teeth cleanings, dental sealants, fluoride treatments, tooth-colored fillings, and athletic mouthguards. Dental sealants are important because children may not reach some of the areas of their teeth when brushing or flossing. The application of a dental sealant only requires a few minutes, is painless, and provides several years of protection.

Addison Family Dentistry is also ready to handle dental emergencies, which may be due to an injury or neglect of oral hygiene, resulting into an oral infection. Such problems include toothaches, chipped or broken teeth, knocked-out teeth, or a lost filling or crown.

Meanwhile, they can provide root canal therapy when there is decay and damage in the inner part of the tooth, known as the pulp, where the nerve is located. When the nerve is exposed to such damage, it can result into a severe toothache, which is an indication that a root canal may be required. If root canal therapy is not provided early enough, the tooth may need to be extracted.
