

Car Shades With Dog Design Receives More Positive Reviews Announces 3 Bees and Me

September 27, 2015

September 27, 2015 - PRESSADVANTAGE -

3 Bees and Me, an online based baby product company, shared earlier how happy they are that their car shades with dog design continue to receive positive reviews from valued customers. They see this as a definite proof that they are slowly reaching their ultimate goal as a company, which is to provide a useful and high-quality product.

?First of all, we want to thank everyone for supporting our sun shade with nylon mesh screen. We are very happy to receive awesome feedbacks from those who have bought our product?, says Holly James, 3 Bees and Me representative. ?It is truly overwhelming to hear how much you love our car shade. We want to let you know that we appreciate each and every feedback that we receive and we plan to use them to improve our products and our services.?

As seen on Amazon website, the car shades have received a lot of great reviews already such as the following:

Extremely adorable and really does a wonderful job shading your little one. This shade not only fits nicely in

larger windows but it fits great in my small Toyota windows too. I appreciate the fact this shade is darker than most yet it is still easy for the driver to see through safely. Storage is very easy with these. They twist and fold down in to small circles. The suction cups that come with these shades work very well and attach easily. The company even sends along two extra suction cups! My little grandsons absolutely love the puppies in the windows. I highly recommend these top quality shades and feel they would also make a terrific gift. ?Deanna Middendorf

These little puppy dog sunshades are so adorable! My son loves them, as I knew he would. He loves dogs, and now every time he gets in the car he starts pointing at the sunshades and saying "doggy, doggy". They add a little fun to the car ride! ?Kandice

I purchased this to protect my soon-to-be-here son from the sun rays when he is in the backseat. I was a little worried since we do not have tinted windows and I know I cannot keep an eye on him all the time while driving to make sure that he is comfortable. These shades lessen the sun rays considerably. Not to mention that they are super cute, I have had a few compliments about them already. The suction cups make installing the shades really easy and the shades pop up easily after taking them out of their packaging. I am very pleased with the purchase and think that these will make future rides during a sunny day much more comfortable for my son. ?Vanessa

This is made of nylon mesh screen that is a shade or two darker than most shades available today. This will ensure that the glaring rays of the sun will not become too uncomfortable for the passengers. Moreover, it boasts a unique and cute dog design that is ideal for parents with babies and small kids. Each set comes with two extra suction cups that are totally free.

Good reviews are helpful for companies especially those pertnered with amazon.com. If the trend continues, 3 Bees and Me is on the right path to become a global brand in the very near future.
