## **Cream For Stretch Marks Receives Positive Reviews Announces Bella Joi**

*September 23, 2015*

September 23, 2015 - PRESSADVANTAGE -

Bella Joi announced earlier how thrilled the company is because of the good reviews that their cream for stretch marks has been receiving. They have always valued customer satisfaction and have always welcomed feedbacks, which they use to further improve not only products, but their over-all service as well.

"We want to tell everyone that we are truly grateful for all the good reviews that you have given for our stretch mark removal cream that is popular among pregnant women. The reviews that we receive remind us that we are doing the right job", says Holly Richards, Bella Joi spokesperson. She further stated, "You can all rest assured that we will continue our efforts to bring to you beauty products that are not only effective, but affordable as well."

So far, this cream has received mostly very positive reviews such as the following:

"My back was a battleground for bad stretch marks before I found this cream. It's only been three weeks, and they're mostly gone. I can wear a swimsuit and not feel horrible about myself all day long. That's very important to me, and always has been. I was able to feel great about myself. And, now that I've taken a

chance on this cream, I'm going to be able to do exactly that. Thanks! ?Misty Rios

?I bought this cream for my daughter in law she's pregnant and it's having a lots of stretch marks and scaring, this cream has helped her greatly it even helped her with itching. It's a great cream and I highly recommend it.? ?Daffne Woodard

?I have a lot of stretch marks on my inner tights from when I lost a lot of weight. Honestly, they make me very self-conscience in the summer. My favorite way to workout is by swimming laps and wearing a bathing suit sucks for me. So pretty much, I am hoping that this will be my miracle cure and help my stretch marks go away. Overall, the main aspect that I like about this lotion so far is that it doesn't feel greasy or oily and also my skin absorbs it really fast. I also personally think that it smells AMAZING. I have only been using it for a little while, but my stretch marks do appears to be a little less red than they were before. They are, by all means, not gone yet, but might be improving in overall appearance a bit.? ?Misty Dawn

Formulated by a naturopathic doctor, it contains three nourishing butters namely Shea, Cocoa and Mango. Aside from these three, each bottle also has Olive Oil, Jojoba Oil, Rose Hip Seed Oil and antioxidants in the form of Aloe. To prevent the greasy feeling when applied, it also has Caprylic. The formula was made to help nourish and moisturize the skin.

Good reviews are important especially for beauty brands. Bella Joi is very lucky that their customers appreciate their cream. It is still available online at Amazon.com.
