Roofing Company in Clinton Township Blog Suggests Staying with Asphalt Roofs Is Always a Good Decision

June 01, 2021

June 01, 2021 -

Miller's Home Improvement is a roofing company in Clinton Township, Michigan that has always taken it upon themselves to keep their customers well-informed when it comes to roof installation and repair decisions. An example of this comes in the form of a recent blog that the company posted on its website. It?s a blog titled ?An Asphalt Roof Is Always a Wise Roofing Decision?. This new blog article discusses why people who are about to undertake a roof replacement project should strongly consider sticking with asphalt shingles instead of switching to another type of roof covering material.

Eric Miller, the company owner, says, ?More and more we get asked by customers what type of roofing material they should choose for their upcoming roof replacement. While I feel that metal, slate, synthetic, and other roofing materials look great and are more durable than shingle, you still have to take a very close look at all that shingle has to offer before making the switch from it. I find that many times when I go over with customers the advantages that asphalt shingle roofs offer, they become much more eager to re-roof their homes with this type of roof covering. My company posted this blog to help keep our customers better informed as to why asphalt shingle is always a good roofing choice.?

The newly-posted Miller's Home Improvement blog started by saying that when a homeowner needs their roof replaced, they may consider other options besides staying with asphalt shingle. This is understandable because more durable roofs such as those made of metal or clay will last longer and raise a home?s value. It was stated in the blog that despite these things, asphalt roofs still have some very appealing benefits. This all starts with the fact that asphalt roofs should last 25-30 years with proper maintenance. The blog points out that asphalt roofs are also a very versatile roofing option. This is because they come in a variety of different styles, colors, shapes, and qualities. The new blog post wrapped up by saying that the number one reason that most people will choose to stick with asphalt shingles is because of its affordability. This Miller's Home Improvement blog post along with many others can be seen on the company website.

Miller also talked more about the commercial and residential roofing services that his company offers. This includes their specialty commercial flat roofing services. The company has talented crews that are very experienced when it comes to laying down such commercial flat roofing materials as EPDM, TPO, and Torch-Down roof coverings. They are also adept in doing roof replacements, finding and repairing leaks, and a large variety of other minor and major roofing repairs.

Both the company?s commercial and residential roofing services have been well-reviewed by the customers that have taken advantage of them. Business owner J Murphy stated, ?They installed a new flat roof for us. Eric was great to work with for he went over the options and communicated as the job progressed. The job was done on time at the estimated price. I would recommend them as a quality roofing contractor.?

Ken Whitley had this to say about the roofing work that was done at his home, ?Eric and his team at Miller's Home Improvement did an exceptional job replacing our entire roof, including a skylight. We solicited multiple quotes, ultimately choosing Miller's Home Improvement based on others' recommendations. Eric was timely and thorough in communicating before, during, and after the project. Minor issues were professionally discussed and quickly addressed. Cleanup was immaculate on both days of the project.?

Miller pointed out that his company services a wide variety of Michigan within a reasonable drive from Clinton Township. This includes Detroit, Macomb, Sterling Heights, Southfield, St. Clair Shores, Warren, and Dearborn. Those that would like more information on this roofing in Clinton Township company?s commercial and residential roofing services can obtain it by calling them, sending them an email, or by filling out the ?Request a Quote? form that?s found at the very bottom of their website?s homepage.
