

Top Ductless Contractor in Pittsburgh PA has Been Accepted into the Prestigious Ductless Directory

June 01, 2021

Pittsburgh, Pennsylvania - June 01, 2021 - PRESSADVANTAGE -

Home Mechanix, a reputable Ductless HVAC contractor in Pittsburgh Pennsylvania announces their acceptance as a high-efficiency contractor in the Ductless Directory. The nationally acclaimed Ductless Directory has strict requirement to qualify for a listing. Acceptance into the Ductless Directory requires a company to have factory-trained employees, brand acknowledgment and a history of serving their community with integrity and honesty.

The Ductless Directory is an educational resource for consumers looking to find a more efficient way to heat and cool their home. As a featured High Efficiency contractor in the Ductless Directory, Home Mechanix is able to reach more consumers via a landing page on the directory and a series of educational videos. As a consumer resource, the messaging in the directory is designed to inform consumers about the many benefits of going ductless including, cost savings, increased comfort, energy savings, health and safety benefits and the significance of embracing eco-friendly products that reduce the effect of fossil fuels on the environment.

Those at this Ductless Mini Split Pittsburgh Pennsylvania company state that acceptance into the Ductless Directory could not have come at a better time. This is because Ductless Mini Split systems are quickly gaining in popularity in the Pittsburgh area. Consumers are becoming aware of the many advantages that ductless heating and cooling systems offer. This includes lower installation costs because they have no ductwork and they also take up considerably less space than more conventional central heating and air systems. Since they don't need to have invasive ductwork installed, they also are a great heating and cooling option for new additions, finished basements, and detached garages. The staff at Home Mechanix stated that these systems have some of the highest energy efficiencies and because they don't require ductwork, consumer can avoid the loss associated with traditional forced air heating and cooling systems.

This also explains why the company is focused on the installation, maintenance and repair of ductless heating and cooling systems at this time. The company's spokesperson, Mat Stone says, "Energy Efficiency and increased home comfort is the name of the game right now. Today more people are working and schooling from home. With more people at home more of the time it's essential for people to convert to the highest energy-efficient products. We choose ductless mini-splits because of their ultra-high efficiencies that not only save homeowners money but also reduce their impact on the environment." Stone goes on to say that as part of their commitment to quality they have aligned themselves with Daikin, the world leader in Ductless Technology.

We chose Daikin because we believe them to be the leader in ductless technology. Daikin is known the world over for their innovation, reliability and dependability. As a Daikin trained and certified Contractor, we know how to evaluate your home to ensure you get the right product selection and a professional installation." Their technicians are also NATE (North American Technician Excellence) certified and are expert at Ductless installations.

Those looking for a top ductless contractor in Pittsburgh Pennsylvania can contact them by phone, email, or via the form found on the "contact us" page of their website. Stone also pointed out that those who purchase a ductless mini-split system in the near term may also be eligible for rebates and incentives.
