

NitWits Announces Best And Safest Lice Treatment is Natural Method

June 04, 2021

June 04, 2021 -
Professional Lice Removal Salon Offers All-Natural Product To Stop The Lice Life Cycle

Belmont, Massachusetts ? NitWits, a premier Boston-area professional head lice removal salon, today announced that a natural head lice remedy is the only way people with head lice can get rid of the infestation.

NitWits' co-founder Berit Pratt, RN BSN MPH, states that head lice have developed resistance through the years to the pesticides used in several over-the-counter lice removal treatments and that the only way to ensure they are removed for good is to use a head lice removal comb, such as the OMG Nit-Free Terminator Comb. The product physically removes lice and nits from the scalp without the use of dangerous chemicals and insecticides. Physical removal of the insects from a human host is the only way to break the life cycle, as head lice mature and reproduce quickly.

"Lice have a 30-day life cycle, and a female louse can lay 10 eggs a day for 10 days. The eggs are laid close

to the scalp and are attached to hair strands with a sticky substance. In a week, these eggs hatch and the cycle begins again. These eggs are resistant to traditional lice shampoos and will hatch after a treatment has been applied. That's why we use a head lice comb at our salon in addition to our proprietary hair conditioner product, which lubricates the hair strands so lice and nits can be more easily removed. Physically removing every nit and louse from the scalp is necessary to stop the life cycle."

NitWits has helped thousands of Boston-area clients get rid of head lice for good with their products. Both their hair comb and conditioner are sold on their website for use at home. According to Pratt, using the two products together is the single most effective remedy for head lice.

"Dealing with head lice is extremely frustrating for parents, and often there are no obvious symptoms such as itching," she says. "But just one treatment session combining physical combing with our hair conditioner can stop the problem. We also welcome appointments at our discrete Belmont salon where you or your child can relax while our professionals go to work gently removing the head lice?for good."

The NitWits head lice removal technique is based on Pratt?s personal experience as a school nurse and her research into pesticides and their effect on humans, particularly children. The NitWits team of trained head lice removal professionals have been using the combination of products to successfully rid thousands of Boston-area clients of head lice. The salon treats clients in a private, comfortable environment.

About NitWits

NitWits Lice Removal is the Boston area's premier and oldest head lice treatment service salon. Headed by school nurse Berit Pratt, RN BSN MPH, and co-founder Sonia Simoun, the salon specializes in all-natural, organic, pesticide-free head lice removal treatment for children and family members affected by lice. Their mission is to get rid of head lice and nits (lice eggs) for good for every client who visits the salon. NitWits' founders developed their own organic, pesticide-free lice treatment products to get rid of lice and nits that are based on 15 years of hands-on experience. The staff also gives educational presentations for students, parents and teachers. Treatment sessions take place in the comfort and privacy of their Belmont salon. Call 617-816-9487 to learn more or to schedule an appointment.
