

Anaheim, CA Reports Rise in Cases of Addiction, Muse Treatment Center in Los Angeles Can Help

June 15, 2021

LOS ANGELES, CA - June 15, 2021 - PRESSADVANTAGE -

Anaheim, CA ? Addiction is a cunning disease that can slowly but surely take over every aspect of a person's life. Whether their substance of choice is drugs, alcohol, or both, it's not uncommon for addiction to negatively impact the personal and professional life of an individual. Unfortunately, cases of substance abuse and addiction have been on the rise around the country in general and in Anaheim in particular, a fact that has caused concern amongst residents. Fortunately, the addiction specialists at Muse Treatment Center are providing assistance in overcoming addiction to any person that needs it.

Muse Treatment Center is known throughout Southern California as one of the best providers of personalized addiction care for anyone who wants to reclaim their sobriety. Anaheim residents choose to seek help at the Los Angeles-based center for a number of reasons.

Muse provides clients with the opportunity to take advantage of either an inpatient or an outpatient program. Clients that decide to work through inpatient addiction treatment programs have peace of mind knowing that

they have a safe and secure environment where they can receive full-time care as they begin to heal from the effects of their addiction.

For many, inpatient care is not a viable solution. Muse also offers a comprehensive outpatient treatment program. Outpatient treatment gives clients the opportunity to participate in various forms of evidence-based therapy while still having the flexibility to return home every night.

Muse clients consistently report the treatment center creates a warm and welcoming community-oriented environment. Their team is mostly made up of people who are in recovery and can empathize with patients as they navigate the challenges of early recovery. The staff also serve as examples that successful recovery is possible and that a happy healthy life is waiting on the other side of rehab. The strong support network that's formed in treatment continues to provide a sense of community long after treatment is over. Through aftercare programs, support group meetings, alumni events and the close bonds of friendships forged during this formative time create a lasting recovery community that supports clients in their long-term success.

For anyone struggling with substance abuse and addiction, help is available. Muse can be reached anytime day or night to answer questions and provide guidance in taking the first steps towards recovery from the disease of addiction. Call (800) 426-1818 or go to www.musetreatment.com.
