

Foothill Waste Solutions Newly Launched Website Includes Convenient Online Dumpster Rental Booking

June 24, 2021

June 24, 2021 - PRESSADVANTAGE -

Foothill Waste Solutions is a company that always strives to put customer service at the forefront of its business. Evidence of this comes with an announcement that they have just launched a new and improved website that is more customer-friendly than ever before. The highlight feature of this new website is that residential and commercial customers can now conveniently book their roll-off dumpster rentals right online. These steps are all part of the plan that this company has in place to remain one of the premier dumpster rental companies in Sandy Ridge, Greensboro, and the surrounding North Carolina areas.

The company owner, Justin Shelton, says, "We are always looking for new ways to give our clients a better customer experience when dealing with us. That's why we decided to put a lot of time and effort into creating a new website that's simple to navigate around and takes our customers quickly to the information about our services that they need. This new website combines our staff's many years of experience in the junk and trash removal business with our IT service's expertise and innovation when it comes to website design. We here are all pleased with the way the new website turned out and the response from our customers that have used it has been very favorable too."

Shelton went on to explain a little bit more about the goals that they had when creating the new website. This includes having a color scheme and background that make the text on the pages stand out and easy to read. He says their service descriptions are also now presented more concisely. The new website's highlight feature, the online booking system, is also very easy to find and use. The company owner says that all someone has to do to book a dumpster rental with them is click on the "Book Online Now" link on their website's homepage. That customer will then arrive on a page where they will see all of the dumpster choices that Foothill Waste Solutions has made available to them. This selection includes a 10-yard dumpster that is usually sufficient for many household cleaning projects, 15- and 20-yard dumpsters for medium to large size trash hauling projects, and 30-yard dumpsters which are great to use on the biggest commercial rubbish removal jobs. He also talked about how in their bid to be as transparent a company as possible, the new website displays all of their dumpster rental prices and the conditions for rental such as the allotted rental time period and any associated extra charges. A customer just needs to select the dumpster size they are interested in and then the website will guide them through the rest of the dumpster rental process.

The recently launched Foothill Waste Solutions website also mentions the many types of junk and debris that they will haul away for both business and residential customers. This includes refrigerators, garbage, mattresses, construction debris, yard waste, e-waste, appliances, furniture, and hot tubs. He pointed out that their services are also perfect for those that wish to do business, attic, basement, and garage cleanouts. It was also stated in the improved website version that in addition to Sandy Ridge and Greensboro, this company also provides its wide variety of trash removal services to those in Oak Ridge, Stokesdale, Eden, Reidsville, and many other nearby areas in North Carolina. There is even an embedded click-on feature that will show a prospective customer if their location falls inside the company's service territory.

Customers that have used the dumpster rental services that Foothill Waste Solutions offers have expressed quite a bit of satisfaction with the company's efforts. Ansley Q wrote in their 5-star review, "Hiring Foothill Waste Solutions is one of the smartest decisions that we ever made. They gave us great value and high-quality service. I strongly recommend them to everyone interested in dumpster rental services." Arie S proclaimed, "These guys did exactly what they said they would and with great quality service. Their dumpster service was exactly what our business was looking for."

Those that would like more information on the services that Foothill Waste Solution offers or want to conveniently book a dumpster rental online can do so by going to their new website which is found at <https://www.foothillwastesolutions.com/>.
