

Roof.Net Adds to Its Impressive Collection of 5-Star Reviews

June 29, 2021

Fairfax, Virginia - June 29, 2021 -

Fairfax, VA-based Roof.Net is one of the most well-reviewed roofing companies in the entire United States. One has to look no further than the amazing amount of 5-star reviews this roofer has received on its Google Maps Business listing to confirm that. Now they have just announced that two more glowing reviews have been received on that web page. That makes over 400 5-star reviews that Roof.Net has now received on its GMB Listing. This total becomes even more impressive when the 5-star reviews that they have received in such places as Yelp and Twitter are added into the mix.

The first of the new 5-star GMB Listing reviews that the company received can be seen here at https://goo.gl/maps/5exZt4piK1ZJHJUy6. In it, Bonnie Li stated, ?Don't look any further and save yourself some time. Ken and his team are the best there is. My neighbor and I just replaced both our roofs together today and we couldn't be happier. I had 10+ companies coming for on-site visits before I decided to go with Roof.net. They have the lowest price without any sales BS. I had a couple of local companies trying to convince me to replace all plywood etc. for $10,000+ and I got it done for less than half of that! It can be

really confusing until you get someone knowledgeable like Ken to explain to you what is what in layman's terms. Turns out - I barely needed to have any plywood replaced after all. They did our roof job using CertainTeed landmark architecture pro shingle, which is a good product that stands 120 miles/hour wind. Ken was here throughout the whole process to make sure it was done right. He took care of the issue that my neighbor's roof is one inch lower than mine and made it a smooth transition. He even helped me to get my neighbor on board with the gutter installation so we can get the shared gutter replaced together. They truly treated my place like their own and cleaned all debris using magnetic tools to make sure no nails are lying around. I honestly feel like I cannot say enough great things about this company. Try it for yourself and you will see!?

In the other newly received Google Maps Business Listing glowing review, Fueller wrote, ?I had my roof leaking, some shingles got blown off in high wind May 27, 2021. I desperately needed repairs asap, so I called 4-5 roofing companies and found Roof.net. Just by talking, I got the feeling that Ken (Roof.net) knew the urgency of my situation. Ken took care of my roof on Jun 3, 2021. Ken and his crew professionally handled the work and he kept me updated from start to finish. The best part is the pictures of the whole process which included removing the old roof and installing the new one that he sent to my email. Very honest ? they only change what needs to be changed and they also will show you pictures. The roof came out Beautifully.? This review can be seen by referring to https://goo.gl/maps/RhDJerMjYtZhZid56.

If the high number of 5-star reviews that this company has received do not convince people of the quality of the roofing work that they do, then the 22 national awards that they have received should do the trick. This includes being a Best of the Best award winner 5-years running. The large number of 5-star reviews Roof.Net has received has also made its services very in demand. That?s why the owner, Ken Briesemeister, confirmed that they are mostly doing only whole roof replacements at this time along with any warranty repairs that should come up. He expressed that his crews really love doing this type of roofing work because they have the knowledge and equipment to do the job right every time. There also get much satisfaction when taking off an old layer of shingle or other roof covering and then putting on a new layer that looks great and leaves a home?s roof completely watertight once again. The company owner stated that in addition to his crews? experience, they also use nothing but the very best roofing materials.

Those in the Fairfax, VA area that are interested in getting more information on the roofing services that Roof.Net offers can refer to their website or go to their LinkedIn page which is found at https://www.linkedin.com/company/roof-net.
