

Charlotte Crawlspace Solutions Offers Crawl Space Basement Waterproofing in Matthews NC

July 06, 2021

July 06, 2021 -

Charlotte Crawlspace Solutions, a company based in Monroe, NC, is happy to announce that they can provide crawl space basement waterproofing services in Matthews, NC, and surrounding areas. Regardless of whether the water problem has to do with the basement or crawl space, it is vital to determine where the water is coming from. Thus, the first thing they will do is to find out if the problem stems from roof runoff, landscaping, or other problems such as underground springs or high water table.

Carlos Rendon, president of Charlotte Crawlspace Solutions, says, ?We?re excited to be able to provide our crawl space basement waterproofing services in Matthews and neighboring areas. We can assure the quality of our services because of our experience and training. My hands-on experience has given me a unique advantage in today?s competitive and confusing contracting environment. I have worked with several local companies in the Charlotte market which has helped me acquire specialized training and experience in a

variety of areas not commonly taught at the class room level.?

In basement waterproofing, the technicians from Charlotte Crawlspace Solutions will consider a number of factors. First, they will check if the landscaping is causing water to move away from the home?s foundation or it is directing water towards the basement or crawl space. Second, they will determine if the water problems are being caused by rainwater discharge as as a result of the rain gutters being too close to the home?s foundation. Third, they will check if the size of the rain gutters is large enough to handle the square footage of the roof area or it is too small that rainwater cascades from the rain gutters during a heavy downpour. And fourth, they will find out if the rain gutters are clogged, thus, preventing the proper flow of water through the downspouts, resulting into overflows.

After the source of the issue has been determined, the professionals from Charlotte Crawlspace Solutions will establish a game plan to solve the problem. This game plan may just involve some minor changes to the landscaping, or possibly a change in the yard drainage plan to really make sure that the water flows away from the home. It may mean the external waterproofing of the basement wall and/or the replacement of any clogged drain tiles. It may also mean the addition of an interior drainage, such as a French drain with a sump pump or just a sealant coating to prevent cinder block syneresis.

In addition to basement waterproofing, Charlotte Crawlspace Solutions also offers other of services, such as mold remediation, structural repair, and crawl space repair. Mold remediation is an important service because it can be damaging to the family?s health, particularly if someone in the family has allergies or asthma. It is important to realize that the best way to tackle mold in the basement or crawlspace is to prevent it from growing and spreading by finding out possible sources of moisture and then controlling the entry of moisture in the area.

However, if mold has already established itself in the basement or crawlspace, the professionals from Charlotte Crawlspace Solutions can help. They have the knowledge and expertise to determine the sources of moisture, clean and get rid of the mold, and they can provide a game plan designed to prevent mold from growing again.

They can also offer structural repair or wooden crawlspace structural replacement. They have more than 20 years of construction experience and are well qualified in providing structural wood repair work that is required in restoring the crawl space to its previous original structural integrity. They specialize in repair and replacement of the crawl space structure that was damaged due to mold, pests, rot, warping or other events like fires or floods.

Homeowners and other property owners who would like to know more about the crawl space basement waterproofing services available from Charlotte Crawlspace Solutions LLC can visit their website or contact

them through the telephone or via email.
