

Laricks Complete Tree Services Offers Homeowners Advice on the Average Cost of Removing Trees from the Yard

July 07, 2021

July 07, 2021 - PRESSADVANTAGE -

Laricks Complete Tree Services, a company offering tree removal and landscaping services in New Jersey, has published a blog post that gives homeowners advice on what they should expect to pay a contractor when having a tree removed from their property. The blog post can be read in its entirety at <https://www.larickstrees.com/post/how-much-does-it-cost-to-have-a-fallen-tree-removed-from-my-yard>.

New Jersey has unpredictable weather that can change on a dime. Strong winds and snow are a common occurrence. They can knock over trees that can damage cars, property, and in some tragic cases, even cause loss of life. To prevent untoward incidences dead, dying, and damaged trees should be pruned or preferably, if the need arises, completely removed from the property. With many options on the market, it can be overwhelming to pick a service that is offering excellent service for a reasonable price.

Since having trees removed is not a frequent home maintenance event, one might not be aware or they may

be out of touch about the money it costs to get something like that done. Laricks Complete Tree Services has published a blog post that gives readers a general ballpark figure of what they can expect to pay for certain tree removal services. The company recommends that one should shop around and consult with multiple local companies by comparing their online reviews to find the best balance of service quality and cost to avoid being taken for a ride by an unscrupulous tree services contractor.

A typical basic tree removal service involves 3 parts that are cutting down the remaining trunk portion after the tree has fallen, climbing up the trunk to cut it into more reasonably managed pieces, and finally hauling away the fallen pieces of the tree. The average price depends on the size of the tree. The type of wood can also make a difference as some kinds are softer and easier to cut through. Readers can find out more about the tree removal service offered by Laricks Complete Tree Services by heading over to its website at <https://www.larickstrees.com/>.

A large tree that is 75 feet or taller requires special equipment as the technicians will need to scale the tree to chop and rope down the tree pieces before felling it completely. Felling tall trees can cost at least \$1500. A medium tree can cost around \$200 to \$1000 to remove. A small tree can be removed for about \$75 to \$150. Oak trees have solid wood and will have generally higher costs of removal. Pine trees are taller than other tree species and thus will also cost more on average.

There are a few other tasks that might not be covered under the umbrella of the basic tree removal service. Tree limb removal is usually a separate, add-on cost. Stump removal is the same and can cost anywhere between \$50 to \$400. Removing the tree stump may be an hourly charge or the homeowner may have to pay by the diameter. Chipping the limbs can cost between \$50 to \$80. Removing just the limbs of the tree without chopping it down can cost the homeowner anywhere from \$200 to \$300 per hour for the technician's time. Chopping the tree trunk into smaller, more manageable pieces is an add-on expense that can cost between \$50 and \$150. Log splitting so that the felled tree can be used as firewood costs around \$75. If the homeowner's site is far away from the company's base of operations, they might even tack on some extra travel fees.

Laricks Complete Tree Services offers services such as tree removal, stump grinding, lot clearing, snow removal, and landscaping.
