

TDJC Releases Traktor Tutorial To Guide Young DJs To Success

September 29, 2015

September 29, 2015 - PRESSADVANTAGE -

TDJC today announced the official launch of its Video Tutorial for aspiring Traktor DJs. After gathering and implementing feedback collected from the pre-launch, TDJC released the final version of the Traktor DJ Course which is now available on their website.

The first thing folks should expect is reaching a professional level of knowledge and confidence with Traktor Pro in the shortest time possible. Traktor Tutorial makes this happen by guiding the student through a tested and systematic approach. This is to be expected from a business who places this much value on leading aspiring DJs to success on a proven path.

For die hard fans of the industry, they'll be interested to know what went into creating the Traktor Tutorial. It has taken 3 months to develop, from start to finish, from the initial idea to creating the final course. The information provided has been battle-tested in over 200 DJ gigs.

The Video Tutorial is made up of 28 professionally produced HD videos organized in three sections.

Part one is dedicated to getting started with the Traktor controller and software, sourcing and organizing tracks, editing cue points and setting up preferences. It also covers the essential content of a DJ bag ? a checklist of ?don't forget? items when preparing a gig.

Part two is all about mixing and beat-matching ? the bread-and-butter skills of any DJ. How to perform seamless transitions, use equalizers, effects and organize playlists. Examples at the end of the section demonstrate the techniques in action.

?Mixing in Key? is a hot topic in the DJ world today and considered ?the next level of DJing?. The tutorial reflects this fact by dedicating the third part of the program specifically to this important skill. Basics in music theory are discussed along with the practical implementation of this technique that will help any DJ to stand out from the crowd.

Rounding off the video tutorial, the bonus section of the course includes a downloadable key-shift-mapping for the S2 controller, the eBook version of the course, email support, charts and much more.

TDJC will be celebrating the launch by offering a 40% discount until October 5th. It is their hope that this will give passionate young DJs who are on a tight budget an opportunity to join the membership program at a reduced price and make use of it for their own benefit.

Dano EF, Founder and creator at TDJC also wanted to add: "This traktor tutorial summarizes the experience of over 200 DJ gigs and 15 years of experience in the industry. I have a strong sympathy for young people who are passionate about music and start out on their journey to become successful DJs. I know how difficult this endeavor can be and with this course, I am paving the way for them and taking away many stumbling blocks.?"

More information about the program itself can be found at <http://traktordjcourse.com/traktor-tutorial/>.
