Crane Network LLC is Offering New and Used Cranes For Sale

July 16, 2021

July 16, 2021 -
Crane Network LLC is the oldest and most popular online marketplace for new and used cranes for sale and rent.

A boom truck is a hydraulic crane mounted on the chassis of a commercial truck. Straight and telescopic booms are the most common but one can even find boom trucks with articulated cranes mounted on them. They have a wide array of uses in a range of industries such as oil and gas, wireline, coil tubing, commercial roofing, power transmission maintenance, and artificial lift. The crane is mounted on the truck at different locations based on its intended use. Some machines where the crane is mounted on fifth wheel tractors are called tractor mounts. On rear mounts, the machine is mounted at the rear of the truck and the boom is stowed forward. Boom trucks are also differentiated based on the terrain that they are built for. Rough terrain cranes, which are not permitted on the highway, are 2-3 axled machines with large pneumatic tires. They are always carried to the job site on a trailer. All-terrain cranes have multiple driving axles, can travel on the highway, and can handle reasonably rough terrain. The Crane Network LLC?s website has a wide range of boom trucks for sale and rent.

Apart from boom trucks, the website can also help those looking for cranes in categories such as aerial man lifts, all-terrain cranes, bridge inspection lift, bucket truck cranes, carry deck industrial cranes, construction elevator hoists, crawler lattice boom cranes, crawler telescopic boom cranes, derrick, down cab rough terrain cranes, drywall pallet fork material cranes, gantry cranes, hi reach cranes, hoists or winches, hook lifts, knuckle boom articulating cranes, material handler cranes, mini cranes, overhead cranes, pile driving cranes, rough terrain cranes, service truck crane, ship loaders, sign ladder, telehandler forklifts, tower cranes, trailer-mounted cranes, truck-mounted lattice boom cranes, truck-mounted telescopic boom cranes, and trucks or trailers.

The website has a lot of features that make it easy to find the exact kind of crane that one is looking for. The user can narrow down the type of crane by selecting one of the many aforementioned categories. The user can further narrow down the selections based on the manufacturer?s name and the model of the crane. The listings can be sorted in ascending or descending order based on their different labels such as the year of manufacture, the name of the manufacturer, the model, and the price that they are being rented or sold for. Each listing provides images, descriptions, and a list of specifications that allows the user to make the best decision about the item that is suitable for their intended purposes. The description drills down into the specifics of the crane such as the capacity, the condition, unit number, location, hours used, and serial number. Every listing also includes the seller?s contact information so that the user can get in touch with them to begin negotiations.

A spokesperson for the company talks about the website by saying, ?We are offering a feature-rich online community along with excellent customer service and support for a niche market. There are not a lot of people who are dealing with the buying, selling, and renting of cranes and heavy equipment and most of them come to us when they are looking for what they need. The biggest players in this market and small individuals alike trust us with their listings and we provide them with great visibility for their products. For buyers, whenever you are looking to buy, sell, or rent heavy equipment, you are guaranteed to find what you are looking for when you come to us. So if you are in the market to rent or buy a used crane or all looking to get a good deal on machinery that you already own, visit our website and you will not leave disappointed.?

The Crane Network LLC can be contacted at the phone number (214) 612-7626 or at the email address info@cranenetwork.com.
