

Western KY Dumpsters Launches New Website

July 09, 2021

July 09, 2021 - PRESSADVANTAGE -

Western KY Dumpsters is providing dumpster rental and junk removal services in Western Kentucky. The company has launched a new website that contains all the important information customers might need about its dumpster rental and junk removal services. The website can be accessed at <https://www.wkydumpsters.com>.

The company's dumpster rental services include a 13-yard dumpster and a 20-yard dumpster. The 13-yard dumpster can be rented out for 24 hours or 3 days. It is 14 feet long, 7 feet wide, and 4 feet high. The one-day rental costs \$225 and the price includes 2 tons of haulable weight. The three-day rental costs \$275 and the price also includes 2 tons of haulable weight. The 24 hour rental of the 13-yard dumpster will add \$225 for every additional day of rental. The 3 day rental of the 13-yard dumpster will add \$20 for every additional day of rental. The dumpster rental will also add \$75 for each ton over the 2 tons of weight included in the base price.

The company's 20-yard dumpster can be rented out for 7 days. It is 14 feet long, 7 feet wide, and 6 feet high. The seven-day rental costs \$375 and includes 3 tons of haulable weight. The 7 day rental of the 20-yard dumpster will add \$20 for every additional day of rental. The dumpster rental will also add \$75 for each ton over the 3 tons of weight included in the base price.

The company's new website offers a simple online form for placing orders. First, the form asks the customer to select whether they are a residential homeowner or a contractor, or commercial services provider. Then the customer has to choose the drop-off day that works for them using a calendar widget. The customer can pick any day of the week except Sunday and federal holidays. In the next step, the customer picks the dumpster rental pick-up date that gives them the time required to finish the project they are working on. Finally, the form will then display the details of the order which includes the base cost, cost for extra days, and the tax. The customer can then proceed to make a payment.

A spokesperson for the company talks about the website by saying, "We are very excited with this newly developed website that makes the entire process of booking a dumpster rental or junk removal service with us very easy. The ordering system takes the uncertainty out of the equation and gives the customer the exact details of what they are paying for. It will help save our customers money in the long run as they will only pay for what they use without any ambiguity of hidden charges. This website showcases our dedication to providing the best possible service to our customers by bringing the dumpster rental industry on par with most other modern services that have gone the digital route."

The company also offers junk removal services for customers who are working on projects that have already finished and the only part of the process left is to dispose of the trash. The customer has to call the company or pick a date and a two-hour window that works for them using an online form. The company's service professionals will then call up the customer 15 minutes before they are scheduled to arrive and give them a price after quizzing them about the quantity and type of trash that is to be collected. If the customer agrees to the price, the company will move forward with the job and send over its junk removal technicians to the customer's location.

The veteran-owned company serves the areas of Central City, Greenville, Madisonville, Owensboro, Beaver Dam, Bremen, Calhoun, Dawson Springs, Drakesboro, and Hartford. They can be reached at the phone number (270) 608-2106 for all inquiries. The company's website also includes a junk pricing guide that lets customers calculate how much its junk removal services are going to cost based on the type and the number of items they have.
