

Affordable Interior Design In Orange County, CA Now Available

October 05, 2015

October 05, 2015 - PRESSADVANTAGE -

27 Diamonds Interior Design, based in Westminster, CA, has announced the provision of affordable interior design services in Orange County, California, and neighboring areas. Interior design is traditionally very expensive, which the company feels is unfair as it makes it exclusive and elitist. They want to make sure everybody is able to have the interior design of their dreams.

"Most people know what they like in terms of interior design, but find it really difficult to turn this vision into reality," says Anna Shiwlall from 27 Diamonds Interior Design. "Unfortunately, this often means they don't live in the home they really wanted to have, because they cannot afford the services of a professional interior designer. We want to change that and create beautiful homes at prices that don't break the bank."

One of the things that sets the company apart is that they offer flat rate packages. This is very unusual, because most other interior designers use hourly rates, which makes it very difficult for people to determine whether they are actually getting good value for their money. They feel, for instance, that their designer is taking a lot of time without actually needing to do so.

Since the company first started operating, they have received many positive reviews from happy clients. "Anna had unique ideas to keep me within my budget," says Max Jensen. "She always kept an awesome, positive, and excited attitude throughout the whole project."

The company wants to ensure people understand exactly what they will be paying for. This is why they encourage customers to click here for clear pricing information. A one hour consultation, which includes a walk through a property, a discussion about particular wishes, information about pricing and an analysis of materials, costs just \$150.

27 Diamonds Interior Design also wants to introduce clients to the various designers. They have released full information about the team, where customers can get to know the people they will working with. The team includes lead designer Anna Shiwlall, Lisa Conley, Louisa Lam, Sanaz Tousi, Sara Vera, and Sylvia Lopez. The company also employs other members of staff who receive a similar detailed introduction.
