

## **Cosmetic Dentist Acacia Dental Group is Offering CEREC Procedures in Canberra**

*July 16, 2021*

July 16, 2021 - PRESSADVANTAGE -

Acacia Dental Group is offering cosmetic dentistry services such as CEREC, dental fillings, Inlays & Onlays, crowns & bridges, teeth whitening, and veneers in Canberra.

Cosmetic dentistry has grown in popularity due to its ability to change the look of a person's teeth, mouth, and most importantly, smile. Though cosmetic dentistry may have seemed excessive and squarely reserved for vanity a couple of decades ago, it is gaining widespread acceptance as people become more and more concerned about how they look and how it affects their self-confidence. Patients who have self-esteem issues due to problematic teeth or irregular smiles are encouraged to get cosmetic dentistry procedures.

The global cosmetic dentistry market is expected to grow at a CAGR of 2.2% in the forecast period of 2020 to 2025. The industry will be expected to reach USD 1.8 billion by 2025, from USD 16.5 billion in 2019. Cosmetic dentistry is classified based on type, or application. By type, it is classified as teeth whitening, veneers, implants, crowns, shaping, and bonding. By application, it is classified as redress or beauty.

Cosmetic dentistry focuses on improving the aesthetics of the patient's teeth, including the color, position,

shape, size, and alignment. Fillings repair cavities and areas of decay in the teeth to prevent them from spreading. Inlays & Onlays enable large cavities to be filled and work to prevent the need for a root canal treatment further down the line. Crowns are manufactured teeth made of porcelain or ceramic that are cemented in place to cover up damaged teeth or placed on top of implants to replace missing teeth. Teeth whitening corrects staining from the consumption of tea, coffee, wine, or smoking, and fixes their brown, yellow, and spotted appearance. Veneers are thin shells of porcelain that are made to fit on the front of the teeth where they bond with the tooth's surface to hold them firmly in place, improving one's smile.

Cosmetic dentistry is the result of the amalgamation of many disparate technologies that come together to make the experience fast, pain-free, and seamless for the patients. CEREC, a computer-aided design system, is used to create crowns, fixed bridges, veneers, dental implants, and more making restorations faster, more accurate, and longer-lasting. CEREC benefits from a rapid design process that enables a same-day service. CEREC eliminates the need for temporary restorations. The procedure is cost-effective and creates natural-looking restorations that look and feel just like one's natural teeth.

Digital Smile Design or DSD is a fairly recent innovative tool that has had a significant impact on cosmetic dentistry. DSD is used to design and modify the smile of patients digitally and help them to visualize it beforehand by creating and presenting a digital mockup of their new smile design before the treatment physically starts. The biggest USP of the treatment is the visual communication of the end product before the procedure is undertaken. The process also involves the patients in their own smile design process ensuring the treatment is predictable and the rate of patient case acceptance is high.

Cosmetic Dentist in Canberra Acacia Dental Group talks about the use of modern cosmetic dentistry technology in its clinics by saying, "We have been leading the field in family dentistry in Woden. We strive to stay on top of new technologies and treatment techniques that make their way into the mainstream. Our patients have benefitted from our dedication to give them the best of the best when it comes to their dental health. As people become more and more self-conscious about their looks and how they present themselves in their career and their personal lives, cosmetic dentistry is an avenue that allows them to live up to their fullest potential by restoring or recreating what they value the most - their smile. Whether it is through using CEREC, or any other cutting-edge dental technology, you can count on us to have the tools and expertise that will help you get back on the wagon as fast as possible. So if you are looking for the best cosmetic dentist in Canberra, look no further than Acacia Dental Group."
