

Pembroke Pines Lawn Sprinkler Service Shares Google Review

July 19, 2021

Pembroke Pines, Florida - July 19, 2021 - PRESSADVANTAGE -

Pembroke Pines, Florida based EPS Landscaping & Tree Service LLC is reaching out to the wider community to share a recent review they received on the Google platform. The company is dedicated to providing the south Florida tri-county area with exceptional landscaping and tree services, such as lawn care, irrigation services, tree trimming and more.

In his 5-Star review of EPS Landscaping & Tree Service, Jake Glaser praises the services provided by the company, explaining that, "EPS came by and did a "freshen up" of our landscaping. They were fast and efficient! The pictures that were sent prior is what really got the excitement as I could see what it was going to look like!"

Greg O'Connell, a representative for EPS Landscaping & Tree Service LLC, says, "All of us here at EPS Landscaping & Tree Service take a lot of pride in doing our work, and hearing that our clients are happy with the work we've done for them is a great feeling. Whenever someone lets us know that they were excited

by the process and happy with the product, it's a win for the whole team. We are truly grateful for every client who hires us and trusts us to bring their vision to life!?

EPS Landscaping & Tree Service LLC also highlights their irrigation services. With summer coming in, irrigation and sprinkler systems can make an enormous difference in the health of a lawn, especially in hot, sunny areas like Broward County, Florida. Having a well set-up sprinkler system can save the homeowners a lot of trouble.

If local homeowners want to take advantage of EPS Landscaping's services, the company explains that their sprinkler system installation will start with a survey of the property. One of the company's experts will go to the property and run some tests. In the process, they will divide the property into zones based on how much water each area of the yard needs. For example, garden beds may need more water (and different types of sprinklers) than the lawn. Then, should the homeowners decide to go ahead, the company will get to work as soon as possible.

EPS Landscaping & Tree Service also suggests that homeowners in Florida may consider getting a rain sensor, which can be very helpful. A rain sensor will essentially tell the sprinkler system when it's okay to turn on and when the property is already wet enough. While sprinklers can be vital during the heatwaves of the summer period, during wet times of the year, the sprinkler systems may not need to work much at all. Plus, overwatering is not good for the health of the lawn either, which means that rain sensors will both save on money and protect the lawn.

O'Connell says, "A fully-featured irrigation system complete with rain sensors and all the bells and whistles might seem like a luxury purchase, but the truth is that if you hand-water your yard regularly, you might just find that an irrigation service system can pay for itself over time. A well-installed smart irrigation system can prevent a lot of issues like overwatering, underwatering, uneven watering, mushy lawns, inefficient water usage and more."

Jake Glaser is hardly the only client pleased with the services provided by EPS Landscaping & Tree Service LLC. On the Google platform, the company has a perfect 5-Star rating. In a recent review, Vanessa A. writes, "Jessica was the best to be in business with! Called her last minute to get some landscaping jobs done, and her team did amazing! Everything looked great, and I love how efficient they were. Wouldn't work with anyone else. Look forward to working with EPS landscaping on all my landscaping needs."

Those who want to learn more about EPS Landscaping & Tree Service LLC and their services are welcome to visit the company's website for more information. They encourage interested parties to get in

touch with Greg O'Connell directly via email or phone. The company can also be reached through the contact form on their website. The Pembroke Pines lawn sprinkler service maintains a presence on Facebook where they frequently post updates, share media and communicate with their customers.
