Braunfels Roofing Contractor Receives Another 5 Star Review

July 23, 2021

New Braunfels, Texas - July 23, 2021 -
Texas based New Braunfels Roofing - Cool Roofs Inc. is pleased to acknowledge that they have earned another 5-Star review from a satisfied customer. The customer, Kyle Cox, expressed his satisfaction with the roof service provided because it was very professional, punctual and highlights the forthcoming nature of the company. The New Braunfels roofing provider is capable of handling residential, military and commercial installation of roofs and also provides roof repairs and replacements (including roof restorations).

In the review in question, published on the Google platform, Kyle Cox states that the, ?Crew came out and did an inspection, then promptly submitted a quote with recommendations. Very happy with the work. We did have one continuing issue, and they came out immediately and fixed it. Highly recommend these guys. It's hard to find good, honest roofing contractors.? The customer emphasizes the difficulty in finding an honest roofing contractor, and recommends the company quite highly due to this factor. The customer also highlights how thorough the crew was in addressing all the issues and taking action.

With regards to this review, Colt Moncla of New Braunfels Roofing - Cool Roofs Inc. says, ?Getting a top-rated review makes us feel proud because we know we deserved it. This is the fruit of our efforts to

always strive towards 100% customer satisfaction. We are also thankful to our customers who took the time to leave us some kind words. Our customers can have peace of mind with the knowledge that, whenever they call us, we will always do our utmost to be perfect. That?s how we have earned more than 120 reviews on Google ? with an overall rating of 5.0 stars!? Moncla reiterates the company?s goal of total customer satisfaction while also expressing their gratitude towards all the customers who have given positive feedback about the company?s services. The company is happy to handle all of their customers? roofing services and makes quality work a priority at every turn.

Whether the task at hand involves repairs on an existing roof or building a new home, the company and their team is always ready to provide their community with whatever service is required. The company is able to offer their assistance even in emergency situations, such as where a storm or hail has damaged the roof. Hail in particular, is very harmful to roofs because it can break or bruise its granules, which in turn results in a loss of function in the roof. While also providing installation or repair services for the roof, the company handles installation or repairs for gutters. Gutters are prone to blockage because twigs, leaves and other debris can accumulate, resulting in a clogged gutter that prevents the water from flowing through.

The company can also install metal roofs, which have become more popular in recent years because of their durability. A metal roof can have a lifespan of over 30 years with truly little maintenance. In most cases, a metal roof will merely require some repainting, rather than repair or replacement. The company has a team of metal roof specialists who can do installation or maintenance work for metal roofs.

New Braunfels Roofing - Cool Roofs Inc. also provides Texas roofing services for commercial buildings. When it comes to commercial roofs, the company has many years of experience under their belt, having completed more than 300 commercial roofing projects. Their product line for commercial roofs includes options such as thermoplastic polyolefin (TPO), roof coatings, spray foam roofs and metal roofs. TPO is ideal for commercial buildings, offering a roof that is reliable, energy efficient, cost effective, and easy to install. It has exceptional resistance to chemicals, ozone and ultraviolet radiation. Installation also does not require tear-off, which means business operations will not be disrupted. This option also comes with a 15?20-year warranty. Roof coatings can also be provided to extend and protect the lifespan of roof assemblies.

Those interested in roofing services in New Braunfels and the surrounding area can visit the New Braunfels Roofing - Cool Roofs Inc. website for more information. The company can also be contacted via phone or email.
