

Gadget Supply Guy Announces Launch of French Coffee Press Set

September 30, 2015

September 30, 2015 - PRESSADVANTAGE -
Cafetiere With Two Matching Mugs Now Available on Amazon.

Gadget Supply Guy today announced the launch of its 20 oz French Coffee Press, which comes with two matching 6 oz glass and stainless steel mugs. The brand new, sleek designed set is now available for purchase on Amazon.

Gadget Supply Guy French Coffee Press allows coffee drinkers to become baristas in the comfort of their own home. It's simple to use. Just grind fresh coffee beans, add water, and in a few minutes enjoy a perfectly brewed cup of coffee. For those who prefer tea, just add loose tea instead of coffee.

"We created our French Coffee Press for those who love coffee and experimenting with different flavors and strengths," said Katie Eisner, CEO of Gadget Supply Guy. "Our set comes with two matching mugs so you can sip coffee or tea with a friend, while also impressing them with the taste and quality."

Gadget Supply Guy French Coffee Press set has an elegant design that is functional as well as decorative. It provides a low maintenance, affordable option for brewing coffee and tea. Made of stainless steel and glass, it is durable, easy to clean and no extra filters are required.

Using a French Coffee Press, also known as a cafetière, "afetière à piston, Cafeteria, press pot or coffee plunger, is one of the most classic and easiest methods of brewing.

"With the holidays coming up, our French Coffee Press set makes an ideal gift for your coffee or tea loving friends," said Katie. "It's a thoughtful and functional gift that can be enjoyed every day and looks great in all kitchens."

Gadget Supply Guy French Coffee Press can be purchased on Amazon for \$29.95 with free shipping for Amazon Prime members.

Gadget Supply Guy will be launching additional products in 2016.
