

Viben VIB-101 Portable Speakers for Android Clinch 5-Star Rating on Amazon

November 03, 2014

November 03, 2014 -

Wilmington, DE ? Viben, a maker of quality audio speakers and accessories, announces their recently launched VIB-101 portable speakers have garnered the highest possible rankings on Amazon. Viben, one of the newest contenders in the portable audio accessories market, revealed in September its partnership with Amazon to offer the VIB-101 Bluetooth portable speakers for Android. Since the product's launch, the VIB-101 reviews have included only positive feedback from customers and the speakers have received only 5-star ratings.

Customers who have purchased the VIB-101 state some of the benefits of the system are its ease of use, convenience, portability and affordable pricing. Reviews from Viben's feedback rating on Amazon also included comments such as ??plenty loud without distorting,? ??good sound that doesn't break the bank? and ??the design and function are fantastic? from those impressed with the quality of sound emitted from such a small speaker system, which is only 2 ½ inches by 3 5/8 inches in size.

The online reviews also show Viben's commitment to customer service. The VIB-101 is the only Bluetooth portable speaker system backed by a lifetime, no hassle and free replacement manufacturer's warranty. Viben also offers fast shipping free to Amazon Prime Members.

This mini speaker system is capable of achieving loud volumes with its 5 watt loudspeaker output. The VIB-101 portable Bluetooth speaker system offers listeners a clear, rich sound from its 40MM driver, while its 50MM LF diaphragm provides a strong bass. Housed in a durable case with metal speaker mesh, the system also includes a rechargeable lithium ion battery for up to six hours of continuous use, a micro USB charging port and an audio line-in jack for the option of using it as a wired speaker.

The built-in speakerphone allows users to pause from listening to music and talk to callers while they are performing other tasks. Since the speakers are compatible with a range of operating systems and other mobile devices, Siri users on iPhone have the additional benefit of the microphone function that allows for hands-free conversations.

Unlike comparable speakers, which are typically priced over \$100.00, the Viben VIB-101 Portable Bluetooth speaker system is available for purchase on Amazon.com for \$59.99.

About Viben

Viben was founded by Chris Darling as a company dedicated to creating a high quality experience for everyone who loves to listen to music. The VIB-101 portable Bluetooth speaker system is the first product from the company. Viben is currently in production of a new wireless headphone that the company plans to unveil in the near future.
