

Oklahoma Roofing Contractor Opens New Office In Norman

July 23, 2021

Edmond, Oklahoma - July 23, 2021 -

Norman, OK based Roof Pro Local is pleased to announce that they have opened an office at 800 West Rock Creek Road Norman, OK 73069. The company expects that this will allow them to serve local customers more expediently.

Roof Pro Local has been providing residential and commercial roofing services in the state of Oklahoma for more than two decades. During their more than 20 years of service, they have accumulated a great deal of experience and knowledge, which helps them to provide top-quality, professional workmanship. They also understand that each roofing product is unique, and this is why they try to understand their customers' specific situations and needs in every individual case. They exert their best efforts in all projects given to them by their customers, from simple roof repairs to new roof installations and even to clean-ups after they have finished their task. In each of their projects, they also learn a little bit more and further improve on their already excellent services. Thanks to this attitude, Roof Pro Local is able to guarantee that their customers will always be satisfied with their services.

Roof Pro Local is a fully licensed, bonded and insured roofing contractor, so homeowners and businesses do

not need to worry about dealing with any accidents that may occur onsite. They only make use of good materials and quality components. This, combined with the excellent abilities of their staff, ensures a high-quality roof that will satisfy all their customers' needs. They also strive to maintain clear and thorough communication with customers from the beginning to the end of all roofing projects. Their combination of experience, craftsmanship, communication and credentials has made them one of the top options for roofing services in Oklahoma. In fact, they have been contracted to do around 500 roofs since just 2018. They are also continuing to grow, having hired three more reps in the past year.

In order to address the various differences between roofing projects, Roof Pro Local has created a tier system. Each customer can choose which tier best suits their needs and budget. The highest tier is more suited for the most demanding roof installations, while the lowest tier may be more suited for simpler projects such as small roof repairs. No matter which tier they choose, customers can rest assured that they will receive nothing but the highest quality of services from Roof Pro Local. Roof Pro Local also provides free and fair estimates so that their customers will have a clear idea of how much a project costs before having to commit to it. They can now also help customers save up to 40% on their premium using the Roof Pro Local system. More information about Roof Pro Local's tier system can be found on their website.

Roof Pro Local also offers roof weather damage repair services. Oklahoma is no stranger to intense weather, with thunderstorms, heavy winds, tornadoes and hail often wreaking havoc in the state. These weather situations can damage roofs in a way that can lead to further harm to buildings and businesses. As such, weather damage must be immediately dealt with. Fortunately, Roof Pro Local is always ready to deal with damaged roofs.

Roof Pro Local often receives high praise from their customers for their prompt service and professional conduct. James Thorpe says in a 5-Star Google review, "Bruce Middlebrook at Roof Pro Local was a pleasure to work with. He is very responsive to your needs and situations working with our insurance company to get the most coverage possible. The installation crew were great and did an outstanding job, leaving not one scrap of trash or nails! Mike from Roof Pro was on site all the time supervising, and made a special trip to all of our neighbors to explain what was happening and assured them that all debris would be cleaned up as it was windy those two days of installation. First rate company."

Linden Bailey says in another 5-Star Google review, "Aaron and Craig with Roof Pro Local are awesome. Completed the roof replacement in one day, including tear off and re-roofing. I have a 2200 ft² home. They put ice shields all the way around the edges of the home, including the valleys to protect against the elements. Very thankful they did because of the winter we just had. I highly recommend them."

Those looking for reliable and skilled roofing contractors in Oklahoma are welcome to check out Roof Pro Local's website for more details. The company can also be reached via phone or email.
