

DecoClosets Launches E Commerce Store with a Collection of Closet Accessories

July 21, 2021

July 21, 2021 - PRESSADVANTAGE -

DecoClosets, a company based in Doral, FL, is happy to announce that they have recently opened their e-commerce store with a collection of closet accessories. These closet accessories are all designed to help people organize their closets. The company is a provider of contemporary, modern, and decorative custom-tailored closets for homes in the United States. They also fabricate modern bi-fold doors, folding doors, glass closet doors, room dividers, barn doors, wall slide doors, office partitions, closet organizers, and custom doors for air conditioners.

Adolfo Lozano of DecoClosets says, "We have exclusive European style and design closet doors, closet organizers, and interior doors, providing more space and a unique style for consumers. Customers can also design their own closets along with the doors to make sure that these match with the furniture of their home, office or even the floor."

He adds, "We are committed to providing our clients an excellent quality product and service. We highlight

exclusive design, manufacturing and deliveries on time; based on business processes which allow us to guarantee the product delivered, because satisfying our clients is our main goal.?

Closet accessories now available through the DecoClosets e-commerce store include the Symphony wall organizer, illuminated glass shelf, the Engage collection, racks and valets, hooks, decorative hardware, closet mirrors, poles and cups, shoe storage, laundry hampers, and pant racks.

The Symphony wall organizer's storage capacity can be improved through the addition of coordinated hooks, such as the coat hooks, small and large shoe hooks, and triple hooks. These hooks can be placed anywhere along the wall organizer, resulting in a canvas where the homeowner or designer can be creative while providing for a number of storage requirements.

The illuminated glass shelf can be installed alone or above a drawer to display jewelry and other accessories. This can be easily and quickly mounted with hidden hardware to offer an aesthetic installation.

The racks and valets offered by DecoClosets include the Elite belt rack, Elite scarf rack, Elite tie rack, and Elite valet pin. The Elite belt rack is fully extendable and allows belts and necklaces to be displayed creatively. The fully extendable Elite scarf rack will allow scarves to be displayed stylishly. The multi-hook Elite tie rack allows designer ties to be displayed artistically. It has a full extension ball-bearing slide and it is constructed from solid metal. The Elite valet pin is to be mounted into the fronts of horizontal shelves or vertical partitions to offer convenient and simple places to hand bags or shirts.

The primary service offered by DecoClosets is the fabrication of customized closet systems. Each piece is uniquely engineered and designed, providing a distinctive line of wood-based walk-in closets. To make it easier for customers, they are allowed to select from pre-fabricated modules and accessories to create the unique cabinet that they prefer.

This modular solution can be used for practically any storage issue in the home office, garage storage cabinets, wall units, pantry, laundry, and kid's closet. Meanwhile, these personalized closet systems have satisfied a lot of customers such that DecoClosets has received more than 100 reviews on Google, which are practically all five-star reviews since their overall rating is 5.0 stars.

For example, Anthony O. gave the company a five-star rating recently and said, "That is basically my review. My fiancée and I were looking for closet doors for the master bedroom and after searching online many companies we decided on contacting DecoClosets primarily due to the excellent reviews they have. Looking at their website and the pictures of their work we set up a meeting with Andrea after she emailed us an estimate for the doors. She went over the process with us and showed us a ton of pictures of the work they have done while we were trying to decide on what type of doors. From only thinking about replacing the

closet doors for the master bedroom we ended up replacing the A/C doors, and 2 other linen closet doors for a total of 4 closet doors. Andrea is very knowledgeable and explained to us the different types of doors and her professional suggestions??

Those who want to know more about the custom closets and other related products provided by DecoClosets can check out their website, or contact them on the phone or through email.
