Destination Paradise Releases California 4 K Relaxation Film

July 23, 2021

July 23, 2021 -
GA based Destination Paradise recently released a scenic relaxation film on Youtube that features California drone videography set to calming music. The video offers a way for viewers to discover The Golden State and all that it has to offer. Whether a viewer is interested in visiting California and looking for a way to look at what sights and activities await or simply seeking a way to relax, the video offers a peaceful, soothing look at one of the most well-known states in the world.

The video is the latest in Destination Paradise?s series of relaxation films, which showcase various locations across the United States and the world. ?Discover California,? says Destination Paradise. ?California 4K Scenic Relaxation Film - California, a western US state, stretches from the Mexican border along the Pacific for nearly 900 miles. Its terrain includes cliff-lined beaches, redwood forest, the Sierra Nevada Mountains, Central Valley farmland and the Mojave Desert. The city of Los Angeles is the seat of the Hollywood entertainment industry. Hilly San Francisco is known for the Golden Gate Bridge, Alcatraz Island and cable cars.?

The film explores many locations in California, including such famous places as Palm Springs and Los Angeles and lesser known, almost secret locations that can only be discovered by exploring California thoroughly. Perhaps the most well-known area featured in the video is downtown Los Angeles. Los Angeles is the largest city in California and home to a number of famous industries and locations, including Hollywood, the third largest film industry in the world. With a population of almost 4 million, Los Angeles is the third largest city in North America and is known for its very diverse, vibrant culture ? with people from across the country and the world often moving there to chase their dreams of fame and fortune. The film explores downtown Los Angeles, one of the most vibrant parts of the city where a visitor can find the Arts District, the fashion district and much more. It shows the downtown area at sunset when it is, many would say, at its most beautiful.

Another popular location that makes an appearance in the video is Point Reyes. Point Reyes is a popular tourist destination found in Northern California along the Pacific coast. Point Reyes has a rich history and

offers any who visit beautiful views of nature. Those interested can hike or kayak in the area or partake in bird watching around Point Reye and, with thousands of acres of virtually untouched natural land, Port Reyes is a great place to commune with and observe a variety of other wild animals. Thousands of people visit Point Reyes every year, and the film shows off the location in vivid detail.

The film also takes the viewer to Santa Monica Pier, known all over the world for its views, fishing and the amusement park (which can be seen from far and wide). Santa Monica Pier is also home to an original carousel hippodrome from the early 20th century, the Santa Monica Pier Aquarium, countless shops, entertainers and more. The video provides a brief tour of the pier and some of its attractions.

Destination Paradise is rapidly growing, with a number of the YouTube channel?s videos receiving thousands of views along with excellent comments from viewers; both those interested in visiting these places and people looking for a way to relax. The California video has a number of comments from viewers praising the excellent camera work and choice of music.

One viewer writes, ?California drone footage is another feeling. Thank you.? There are dozens of other comments expressing similar sentiments, be it in the form of text of simply positive emojis. The video has over 3,000 views, and the channel as a whole has over a million views.

Destination Paradise continues to grow as time goes on, and the creators behind the channel hope to continue to produce such videos long into the future, taking their audience to various places around the world. Visit Destination Paradise?s channel to watch some of their soothing, expertly filmed videos or simply relax to the sound of the comforting music each video is set to.
