# Destination Paradise Posts New Mexico 4 K Relaxation Film

*July 23, 2021*

July 23, 2021 -
Destination Paradise has recently posted a 20-minute long New Mexico 4K relaxation film taken by an aerial drone. This relaxation film can be accessed through their YouTube channel. The video footage provides relaxing and beautiful locations in the state of New Mexico, allowing the viewer not just to relax but also discover scenic locations in the state. New Mexico is located in the Southwestern US. It is one of the Mountain States found in the southern Rocky Mountains and shares the Four Corners area of western US with Arizona, Colorado, and Utah. It is bordered by Oklahoma to the northeast, Texas to the east-southeast, and by two states of Mexico to the south and southwest, by Chihuahua and Sonora, respectively.

New Mexico is the fifth largest among the 50 US states, but it only has a little more than 2.1 million residents, which puts it in 36th place based on population, and 46th place according to population density. It has a wide ranging climate and topography because of its geographic location. The eastern and northern regions have a colder alpine climate while the southern and western regions are more arid and warmer. Meanwhile, the Rio Grande and its fertile valley runs from the north to the south, providing a riperian climate through central New Mexico that supports a unique Albuquerque Basin climate and a bosque habitat or gallery forest. Its capital is Santa Fe, which has the distinction of being the oldest state capital. Its biggest city is Albuquerque.

Some of the scenes featured in the New Mexico video footage are: an aerial view of New Mexico Albuquerque; Rio Grande Gorge Bridge by aerial drone; 4K aerial drone view of downtown Albuquerque; Cathedral Basilica of St. Francis, Santa Fe New Mexico Church, by aerial drone; skyline aerial view from balloon of Albuquerque, New Mexico; time lapse view of Ghost Ranch New Mexico Chimney Rock Desert during sunset; hot air balloons above New Mexico Desert at sunset by aerial drone; aerial view of Santa Fe, New Mexico; and Santa Fe, New Mexico sign on train boxcar.

Other scenes include: an exploration of Taos Pueblo, a Native American Landmark in New Mexico; Rio Grande Gorge Bridge by aerial drone, New Mexico; Organ Mountains New Mexico sunset; authentic Native

American dancers; abandoned gas station on a US highway in Tucumcari, New Mexico; white sands in New Mexico during sunrise; drone shot of Rio Grande Gorge Bridge in New Mexico; inside the Cathedral Basilica of St. Francis, Santa Fe Church; San Felipe de Neri Church & Albuquerque skyline; Christian Church in Taos Pueblo, Native American Site; Carlsbad Caverns National Park in New Mexico; view of American park with geology, rocks, stalagmites, stalactites, and water erosion; tourist attraction in Southwest US; and hot air balloon festival in Albuquerque, New Mexico by aerial drone.

New Mexico has five distinctive floristic zones, offering varied sets of habitats for many animals and plants. The Chihuahuan Desert extends through the south of the state and is distinguished by shrubby creosote. The Llano Estacado (or Shortgrass Prairie) in the eastern portion of the state has sod-forming short grasses, such as blue grama, and it is used to sustain bison. The mountainous Mogollon Plateau found in the west-central part of the state and southern Rocky Mountains in the north-central, have a broad range in elevation, with vegetation types corresponding to elevation gradients, including piñon-juniper woodlands near the base, through evergreen conifers, aspen, and spruce-fir forests, Krummholz, and alpine tundra. The Colorado Plateau situated in the northwest corner of New Mexico is high desert with cold winters, and is distinctive because of its sagebrush, greasewood, shadescale, and other plants adapted to the saline and seleniferous soil. The Apachian zone located in the southwestern part of the state has high-calcium soil, oak woodlands, and Arizona cypress, and other plants that are not found in other parts of the state.
