## **Bexley Dental of NSW Discusses the Benefits of Full Mouth Dental Implants**

*August 03, 2021*

August 03, 2021 - PRESSADVANTAGE -

For over 25-years now Bexley Dental has stayed up on the latest trends in general and cosmetic dentistry to help its patients maintain a healthy- and good-looking smile. There is no better example of this than a full dental implant treatment that they offer called All-on-4. It's an implant treatment that offers many advantages over more traditional types of dental implants. This is such a unique dental treatment that those at this reputable dental practice thought it would be good to discuss the benefits of the All-on-4 implant procedure in more detail.

The clinic spokesperson, Zainab Ali, says, "People who are struggling with broken or missing teeth or are dissatisfied with their dentures often feel as if there is no way they will ever be able to enjoy a wide range of foods again and have confidence in their smiles. That no longer has to be the case with a simple full mouth implant treatment that we offer called All-on-4. It is a revolutionary and minimally invasive way for unhappy denture wearers or those with missing or broken teeth to feel somewhat normal again when it comes to chewing and smiling."

Ali went on to say that the All-on-4 dental implant technique is unique because it only requires 4 titanium

screws to be surgically placed in a patient's mouth to secure a full set of upper and lower replacement teeth. This is much different from more traditional implants which require each artificial tooth to have its own fastener surgically implanted. Since the All-on-4 treatment is less invasive than more traditional dental implants, this tends to cut down on patient discomfort and speed up healing time. It also takes much less time to get the procedure done and it can help cut down on the cost in many cases too. Other benefits of the All-on-4 procedure include the elimination of bone grafting and it doesn't require as much bone density to secure an implant as other types of full mouth dental implants. Replacement teeth can also usually be installed faster after the surgical implantation of the screws has been completed and this procedure usually allows for more flexibility to fit those teeth too.

Patients that come to Bexley Dental for All-on-4 dental implants have the good fortune to have this procedure done by a highly trained and experienced Dentist. That dentist, Dr. Theo Spyrakis, has not only done thousands of these procedures but he learned this implant technique from some of the foremost dental implant surgeons in the world. This includes renowned French dentists Dr. Patrick Palacci and Dr. Franck Renouard. He even studied at the Malo Clinic in Portugal under the very person that developed this specialized dental implant technique. Additional intensive surgical implant training in New York and Las Vegas further honed Dr. Spyrakis' already excellent dental implant skills.

Those that have received full-mouth dental implants have been very pleased with the results. Laila Dable wrote, "My husband has had serious issues with his teeth for years and finally decided to do the All-on-4 implants. After having a consultation with Dr. Theo Spyrakis, he was happy to go ahead with the procedure which went really well at all stages from prep to recovery. Dr. Theo and all his staff were very helpful, very caring, and very professional and we highly recommend them to anyone considering the All-on-4 procedure." David Birchall proclaimed, "I would like to share my experiences with Bexley Dental. From the first time I met Dr. Theo and his staff, I was totally satisfied with the professionalism of the business and the way the staff helps me with every visit in the process of having the All-on-4 dental procedure completed. Nothing is a problem; all the steps were explained in detail. No question was too hard to answer. Many thanks for recreating my smile."

For more information on this dental clinic's full teeth dental implants featuring special All-on-4 treatments, interested persons can call Bexley Dental, send them an email, or they can fill out the "Ask Us a Question" form on their website.
