Majewski Plumbing Discusses The Rise Of Smart Water Technology

August 04, 2021

Lower Township, New Jersey - August 04, 2021 -
Villas, NJ based Majewski Plumbing would like to reach out to the wider public and share some information about the rapid rise of smart water technology. As part of this outreach program they recently published an article titled ?Flo by Moen?: Rise of Smart Water Technology? on their website.

Read it here: https://www.majewskiplumbing.com/post/flo-by-moen-rise-of-smart-water-technology.

Smart home devices are becoming increasingly common, and many homeowners have chosen to install them at their primary residence. This is due to the fact that smart technology provides great convenience while also helping homeowners save money by reducing utility costs. One useful form of this smart technology is smart water technology. According to Majewski Plumbing, the smart water technology industry is currently led by the Flo by Moen? Smart Water Security System. The Moen? Smart Water Security System is a collection of smart home products that are designed to work together and protect homes against water loss, damage and leaks. Majewski Plumbing is proud to offer this line of high-tech products.

There are various parts and features to smart water technology systems, and each part has an important function to fulfill. For example, smart water leak detectors are responsible for identifying unexplained moisture. This allows homeowners to immediately stop leaks, preventing further damage that may occur due to flooding and excess dampness. Water leak detectors also save homeowners from the stress and expense caused by water damage and ruined belongings ? while also preventing various safety hazards, such as rotting structures and mold buildup. In fact, smart water leak detectors can detect water leaks in a specific area, so a user can stop a leak and prevent pooling water and flooding. The latest innovation in smart water technology is the Flo by Moen? line. Flo by Moen? features a Smart Water Detector, Smart Sump Pump Monitor and Smart Water Shutoff.

In addition to smart water leak detectors, there are similar smart home products that seek to make homeowners? lives easier, such as the U by Moen Smart Faucet and the U by Moen Smart Shower. The voice-activation powered U by Moen Smart Faucet is an award-winning piece of smart technology that can be used to enhance several faucet collections. It is precise and easy to use and has a model for all kitchen design styles. Meanwhile, the U by Moen Smart Shower is a voice-activated shower that features temperature control, timed showers, remote controls and various presets. Homeowners who wish to learn more about Flo by Moen? may read the full article published on the Majewksi Plumbing website.

Majewski Plumbing is a plumbing services provider founded by Frank Majewski. When Majewski first founded his company, he already had around a decade of experience working under other leading plumbing and construction companies in New Jersey. However, he felt that he could provide better services and customize each job to better suit homeowners? needs. This pushed him to found Majewski Plumbing company in 2004. Frank Majewksi makes use of his 30 years of experience and his background degree in micro-computer technology to satisfy his customers? plumbing and smart home technology needs. More information about the company and their services can be found at the following link: https://www.majewskiplumbing.com/.

Majewksi Plumbing?s customers are also known to be extremely satisfied with the services that they receive. John Barzeski says in a 5-Star Google review, ?I have a summer home at the shore, came down just to check on it on a sunny Saturday late in the winter. I have a basement, which is uncommon for a shore home. I went down to notice my sump pump was not working, and my basement had water in it. I called Majewski, and who answered but the owner, Frank. He said he would be over that afternoon. Within 30 minutes, he was in my basement trying to get my old pump to work. He could not get it to work, but on the next business day one of his guys was there to fix it. Very prompt and professional work.?

Adele Henning says in another 5-Star Google review, ?Frank and his crew are excellent! They not only found and repaired a costly leak while shutting down our summer house, they stand by their work and are very cost effective. We utilize their services every year and will continue to do so. My husband and I strongly

recommend Frank Majewski for any and all plumbing needs.?

Those looking for a trusted and reputable company to install smart home technology are welcome to They may also connect with the company on Facebook here: https://www.facebook.com/MajewskiPlumbing/.

Majewski Plumbing

I have been in the plumbing & construction business for over 30 years. Eventually, I thought I could finesse the services better, and tailor each job better to a client's needs.Thus, 2004 I founded MAJEWSKI PLUMBING.
