

NV Locksmith Blog Advises Owners How Often a Change of Locks Should Take Place on an Airbnb Property

August 12, 2021

Canyon Gate, Nevada - August 12, 2021 - PRESSADVANTAGE -

NV Locksmith is a lock and key services provider that makes it a point to stay keenly aware of the lock security environment in Las Vegas and the surrounding areas. This has led the company to recognize that there are a large number of Airbnb properties available to rent for the many tourists that visit the area. Along with that, the company wants Airbnb property owners to know that there are certain steps they can take to make their rental units more secure. This includes periodically rekeying the locks that are found on these homes. NV Locksmith's managing member, Edan Gal, thought this subject was so important that they posted a new blog to their website that covers this topic. That blog article was appropriately titled "How Often Should You Change the Locks on Your Airbnb Property?".

This new NV Locksmith blog started by talking about how an Airbnb property owner can help keep their reputation intact by keeping the security at their rental property at a high level. Something that is ultra-important for future Airbnb rentals. It then went on to give specifics of situations regarding Airbnb rental properties that necessitate lock changes. The first one mentioned was when someone first purchases a new home they intend to advertise as an Airbnb rental. In the blog, it says this is very important because there is

no telling how many sets of keys to the property the previous owner distributed. Also mentioned in the article as a reason to change locks on an Airbnb property is having recent customers that now have a grudge against the property owner. This could be something like an additional charge for something that the customer broke or when a customer feels that the rental property was not as advertised.

Other reasons pointed out for Airbnb property lock changes include when locks have become old or damaged, when a renter has lost their keys to the property, or when property owners that live far away want to be proactive with their rental property's lock security. The blog wrapped up by mentioning that NV Locksmith can help Airbnb property owners in the Las Vegas area with any mechanical or electronic lock changes that need to be done. The above-referenced blog can be read in its entirety on the NV Locksmith website [here](https://www.nvlocksmithllc.com/post/how-often-should-you-change-the-locks-on-your-airbnb-property) at <https://www.nvlocksmithllc.com/post/how-often-should-you-change-the-locks-on-your-airbnb-property>.

Gal also had this to say about rental property lock security, "We here at NV Locksmith realize that along with owning rental properties, such as those managed by Airbnb, there are certain steps that need to be taken to keep these properties lock security at a high level. This is something that our company specializes in. We offer a wide variety of locksmith services that can help any Airbnb property owner keep their property safer and more secure and give themselves a little extra peace of mind too. We welcome any Airbnb property owner to give us a call and discuss with us how we can help improve their property's all-important lock security."

NV Locksmith's managing member then went on to talk a little more about the specific lock and key services that they offer that can help any auto, home, business, or rental property owner in the Las Vegas area. This includes a wide range of car locksmith services such as broken key extraction, lockout resolution, and ignition lock cylinder replacements. They also offer onsite auto key duplication and lost key replacement services. This includes being able to replicate sophisticated transponder keys right where a customer's car is parked. Home locksmith services are also a specialty of the company. She stated that this consists of such locksmith tasks as rekeying master locks, installing keyless locking devices, and all types of residential lock repairs. As far as commercial locks go, she mentioned that they are experts when it comes to panic bar (push bar) installation & repair, installing and maintaining area access control systems, and even changing safe combinations. Gal added that they are a family-owned 5-star locksmith service that is fast and professional. They are also proud to serve the locksmith needs of those not only in Las Vegas, but customers in Paradise, North Las Vegas, Boulder City, Summerlin, and Henderson too.

For more information on the various commercial, residential, and rental home lock and key services that NV Locksmith offers, they can be reached by phone or email, and this information is also displayed on its website at <https://www.nvlocksmithllc.com/>.
