AP Precision Metals is Serving Customers Searching Online for ?Fabrication Shop Near Me? in San Diego

August 06, 2021

August 06, 2021 -
AP Precision Metals, a custom metal fabrication shop serving San Diego and nearby areas, is offering its contract manufacturing services to anyone searching online for ?fabrication shop near me?.

Contract manufacturing is the process of hiring a company to make products on behalf of another business or company. Inventors and innovators work tirelessly to create new items and designs that challenge existing conventions and make the world a better place. However, once the design is finalized and patented, they are posed with the problem of how to take their idea or innovation to production so that it can actually reach consumers all around the country and the world. Contract manufacturing shops fill this need by providing their expertise with fabrication to produce devices at the scale required by the client business or company.

There are many different types of contract manufacturing services based on the customer?s needs. They are complex or complete assembly, machine control assembly, casting, metal forging, or metal shaping (for example, grinding or milling), and Computer Numerical Control (CNC) machining. AP Precision Metals offers its customers precision metal fabrication, plate cutting, laser cutting, welding, powder coating as well as brass and copper cutting.

AP Precision Metals focuses on providing high-quality services that go through a strict quality control process. The company operates a dedicated Quality Control department to ensure that the products it creates meet all of the clients? expectations and eliminate manufacturing errors. The company has also retrofitted its shop and its processes to meet the strict ISO Standards that its ISO-9001 and CE-certified clients must adhere to. It uses LEAN Manufacturing principles to keep all of its projects running on time, limit waste, and prevent errors within each order. Once the order has been manufactured, the company also ensures that there are no hiccups during shipping through the use of professional packing materials to prevent scratches, chips, and distortions. The company keeps its standard production level below 30% of maximum capacity which allows them to accommodate rapid production increases, expedited prototypes, and other special projects. It also enables the company to be a stable supplier for its clients no matter their size and regardless of fluctuations in the economy.

A spokesperson for the company talks about its contract manufacturing services by saying, ?An experienced and efficient contract manufacturing company will help a client keep their costs low. The client company can trust the contract manufacturer to fulfill its orders without having to invest in a factory or foundry of its own. We aim to be that service that companies and businesses in and around San Diego can turn to when they need to manufacture high-quality products with zero errors. Even if you are not cognizant of the ins and outs of metal fabrication and manufacturing, we have the resources to help you take your idea from concept to finished product. On the other hand, if you are an experienced company that has a clear vision and strict quality control standards, you will find that we speak your language effortlessly. You will find us to be a completely capable partner that will help you turn your vision into reality at a competitive price. Call us today and get in touch with our engineers to start your manufacturing journey with us.?

The company was founded in 1998 and has over 20 years of experience in the metal fabrication industry. It offers a range of metal fabrication services including gas metal arc welding, gas tungsten arc welding, metal fastening methods such as rivets, mechanical fasteners, and VHB tape, CNC cutting, forming, and punching, laser cutting, sheet metal cutting, plate cutting, powder coating, metal finishing, brass cutting, copper cutting, and titanium cutting. It also offers additional tangential services such as shipping, storage, and following ISO Standard practices. It serves a diverse range of industries like robotics, engineering, electronics, aerospace, architecture, and design.

AP Precision Metals can be reached at the phone number 619-628-0003 or at the email address sales@apprecision.com.
