

Plumbing Repair Calgary Service Taking Proactive Steps to Further Increase Customer Satisfaction

August 06, 2021

August 06, 2021 - PRESSADVANTAGE -

Reliable Plumbers Calgary has established a solid reputation in its area when it comes to plumbing installation and repair performance. Despite this, the company is still always looking for ways to give its customers an even better experience when working with them. Proof of this comes in the form of several steps the company has taken to increase its response times, efficiency, and customer service. The company owner, Mike Reliable, believes these proactive new steps will go a long way towards maintaining their reputation as one of the most well-rounded plumbing installation and repair services in the Calgary area. More details about this company's services and recent happenings can be seen on its website at <https://plumbercalgaryab.com/>.

Reliable says, "While it's true that we are already a very highly rated plumbing installation and repair company, we are not one to rest on our laurels. That's why the staff at our company is constantly looking for ways to make our already good plumbing repair services even better. It's an approach that all reputable businesses such as ours have to take to stay on top. We will continue to come up with new ways that leave our customers happy with our overall plumbing installation and repair performance."

The company owner went on to highlight the steps that they have just taken to better serve their customers. It all starts with having hired new employees to carry out their plumbing and water heater services. He added that these are not just run-of-the-mill employees either as each one has the experience, training, and other credentials that will allow them to do a wide variety of plumbing jobs. It was also mentioned that part of the criteria for hiring these individuals is that they have demonstrated an understanding of how important customer service is when doing their plumbing and installation repair work. Along with hiring new employees, Reliable also knew it was imperative to purchase new trucks to take full advantage of their new hires and increase response times in the process. He stated that he also realizes that covering the plumbing needs of those in the Calgary area is a daunting task no matter how many employees he can put on the road at once. That's why he has also taken the unprecedented step of partnering with other plumbing contractors in Calgary. Something that he believes will provide better service and some more affordable quotes for their services.

Reliable expects these new employees to help when it comes to the many different water heater services that they offer. This includes installing the wide variety of replacement water heaters that they carry right in stock. He pointed out that they also do many different water heater repairs including heater element replacements and correcting problems with water heater controls. The company has also become one of the leading plumbing services in the area when it comes to tankless water heater installation and repair. According to the company owner, having more trucks on the road will also help them better serve their customers' emergency plumbing needs. They will do this by requiring both old and new plumbing techs to periodically make themselves available for after-hour emergency plumbing service calls. He realizes that plumbing problems do not just occur between their normal 8 am to 5 pm working hours, so by having a tech on standby they can more quickly respond to any plumbing emergencies that their customers are experiencing. It was also mentioned that these new trucks they recently purchased are a little bigger. That's their techs to stock more commonly used plumbing repair parts inside of them. Something very important when it comes to being able to finish an after-hours plumbing service call in just a single trip to a customer's home or business.

Those that would like more information on the plumbing installation and repair services that Reliable Plumbers Calgary offers can refer to its above-mentioned main website or go to their business site which can be found at <https://reliable-plumbers-calgary.business.site/>.
