The divorce process has a number of steps. The first step is filing for divorce. The process actually begins when the client receives or sends the paperwork to request the court for a divorce. Lisa Amundson wants to emphasize that it is never too early to contact a divorce attorney to get the necessary assistance in preparing for the divorce process. This is important because developing a plan to take care of the shared custody of any minor children and the financial issues takes time. They want to warn people who want to get a divorce not to file their own paperwork. This is because there are a number of potential pitfalls that can have an impact on the rest of the process if not done properly.

The next step is filing for temporary support and custody. While every situation is unique, the spouse who doesn?t have an income will usually be given some temporary financial support. Meanwhile, custody of the children will determined on a case to case basis, with the best interest of the children always taken into account.

The third step is the discovery process. This allows both parties to have equal access to documentation for retirement accounts, home financing documents, and other vital financial information.

The fourth step has to do with custody and financial issues, which are often the sources of most disagreements during the divorce process. Lisa Amundson will ensure that the rights of her client are protected and the best possible outcome is pursued.

The fifth step has to do with the negotiations. The divorce attorney will help the client know when to keep fighting and when to agree to a good compromise. This requires a solid understanding of family law and a lot of experience.

And the sixth step is either to agree to a settlement or to proceed with a trial. After all of the major issues have been settled with both parties, the agreement is then submitted to the family law court for approval. In the event that both parties fail to agree to a settlement, the trial process will then be initiated.
