Origins Eye Clinic Authorized To Offer New Line Of TAG Heuer Eyeglasses

October 13, 2015

October 13, 2015 - PRESSADVANTAGE -

Origins Eye Clinic in Richfield, MN, has announced that they are now an authorized TAG Heuer "Eyewear/Frame" retailer. The clinic began providing this line of eyewear to their patients in July 2015.

TAG Heuer Eyewear includes sporty and lightweight glasses that are designed to showcase the brand's most innovative and advanced patents. Each pair is handmade in France by craftsmen, utilizing a subtle blend of detailing and materials: titanium, medical grade stainless steel, carbon fiber, grilamid tr 90, trivex, composite elastomer and a selection or options of genuine leathers if need be. The designs are available for eyeglasses as well as prescription and non-prescription sunglasses and most importantly, this new iconic frame line compliments the rest of the eyewear collections they carry.

Dr. David Bane, spokesperson for the Eye Clinic, states, "My experienced team and I take great pride in offering every patient the best in vision care. At Origins Eye Clinic, you can expect the best in family vision care and the paramount in eye technology for treatment, diagnosis and management of ocular problems. We are proud to be offering TAG Heuer products in our clinic.

A spokesperson for Groupe Logo states, "We are the last standing iconic luxury manufacturing company in the optical industry. Our three major brands include TAG Heuer, FRED, and Boeing. All are designed and 'handcrafted' in Morez, France."

TAG Heuer, which has developed a solid reputation in Swiss watchmaking, has built on its active commitment in the sports world to create the most accurate timing instruments and watches in the world. Now, that same quality has been built into TAG Heuer eyewear. Well-selected materials and integrated engineering are used for TAG Heuer's 100 percent handmade in France eyewear. All TAG Heuer "Avant-Garde" Eyewear lenses have been designed to be shatter-resistant, ultra-light and provide 100% UV-A and UV-B protection. The company is owned by the Louis Vuitton Moët Hennessy (LVMH) Group.
