

## **Clear Teeth Braces Canberra are Revolutionizing the Teeth Straightening Industry**

*August 18, 2021*

August 18, 2021 - PRESSADVANTAGE -

Acacia Dental Group is a dental practice that can trace its roots back to the 70s. In that time, this dental facility has always prided itself on offering the latest and best dental treatments that can be found in Woden, Canberra, and elsewhere throughout the Australian Capital Territory. A good example of that is they are now offering what's known as Invisalign teeth straightening treatments. These clear braces not only help take away some of the stigmas that are often associated with wearing braces but they are quickly revolutionizing the teeth straightening industry in other ways too.

Dental practice co-principal, Dr. Sirisha Yalamanchili, says, "We have always taken much pride in being a progressive and modern dental practice. That includes getting the knowledge and training required to offer the newest and most comfortable dental treatments that have come out in the industry. Our new teeth straightening treatments that take advantage of clear Invisalign Aligners are proof of that. Now we are seeing a big increase in adult and younger patients looking to get their teeth straightened that were once reluctant to get metal braces. We will continue to look for new and improved ways to help enhance our patients' smiles."

Dr. Yalamanchili went on to describe how Invisalign braces work and why over 6 million people worldwide

have chosen to straighten their teeth using this method. She stated that it all starts with how persistent this clear braces provider is when it comes to developing the best possible teeth straightening method. This includes the development of the "SmartTrack" material that is used to make these clear teeth braces Canberra out of. The company has used its extensive expertise in biomechanics and material science to come up with a material that is multi-layered for strength yet stays highly elastic throughout the treatment. This results in the Invisalign system being able to provide constant but gentle pressure to a patient's teeth during the treatment. Adding to the comfort of the wearer is the fact that advanced 3D printing technology is used to customize the aligners that are used in this form of clear braces treatment. Dr. Yalamanchili stated that this technology also helps them better plan a step-by-step course of treatment for each patient. Each set of specially created Invisalign aligners is designed to be worn for two weeks and treatment times vary according to the level of teeth straightening that a patient requires. She mentioned that since teeth will always try to revert to their old position, as with all teeth straightening methods, a patient will have to follow up on their Invisalign treatment with the wearing of a retainer.

According to Dr. Yalamanchili, there are several reasons why Invisalign braces are a clear winner over more traditional braces. Something which she clarified has much more to do with than just looks. One of which is the fact that in most cases Invisalign treatments proceed along at a faster rate than more traditional braces can. Because of the complex way they are designed they also present a more comfortable fit to those patients that wear them. This also leads to less pain and apprehension as opposed to those that wear metal braces. She added that since this is a technically advanced teeth straightening method there are also compliance tracking wear indicators built into them that allow parents to make sure their teenage children are wearing them as directed. The distributor of the Invisalign teeth straightening system has also made great strides when it comes to keeping these braces as cost-effective as possible.

Those that have sought help improving their smiles with braces or other dental treatments from Acacia Dental Group have been very pleased with those services. Deepti Jajee stated, "My daughter got her braces done at Acacia. The doctor has done a great job and is very good with the kids. I also get my treatments done there regularly and I am always happy with the service." A patient that works at Hathaway Real Estate wrote, "Amazing service and they get to know you on a personal level. Being in real estate you need that perfect smile. All of us here at our company are big fans of Acacia Dental."

Dr. Yalamanchili mentioned that for those that are interested in getting more information on their clear teeth braces Woden, they are welcome to schedule a free consultation with them. She added that the Acacia Dental Group offers a wide variety of general dentistry, cosmetic dentistry, dental implant, and orthodontic treatments.
