

Swim Leaders Launch New Silicone Swim Cap

October 06, 2015

October 06, 2015 - PRESSADVANTAGE -

Swim Leaders, a business based in Portland, Oregon, is proud to announce that they have launched their brand new silicone swim cap. Making its debut on Amazon, it is designed to be used by professional and amateur swimmers alike, and the company expects it to sell very quickly.

"We wanted to create something that was equally suitable for professional and amateur swimmers alike," says a representative from Swim Leaders. "This means it had to be of the highest possible quality, while being user friendly and affordable as well. We believe that we have managed to achieve these goals and are so excited about the launch."

The swimming cap has been designed to be extremely comfortable for both adult men and women. It has been found to provide the right grip regardless of the shape of the swimmer's head. It has a non-slip material that keeps it in place while swimming. The cap, which is made from silicone, weighs just 50 grams and is 20 cm in length and 23 cm in width.

By using the silicone swimming cap, swimmers can keep their hair out of their face, while at the same time

protect it from exposure to pool chemicals. In addition, it prevents the straps of goggles from pulling on the swimmers' hair as they move through water. This is something that amateur swimmers, in particular, find very troublesome.

"We wanted to create something that was truly of the best possible quality and we believe the premium silicone we have used has achieved this," adds the Swim Leaders spokesperson. "Because of this quality, the cap is very lightweight and highly durable. It won't get damaged by chlorine so it will last no matter how often people go swimming with it."

To celebrate the launch of the new swimming cap, the company is now including a free nose clip and earplugs. Additionally, the cap is covered under a 90 day 100% money back guarantee. The ergonomically designed swimming cap has also been created to reduce resistance and drag. It can also fully cover the ears for those who don't want to wear earplugs.
