

Chalet Dental Care: Things To Know Before Getting Veneers

August 20, 2021

August 20, 2021 -
St. Paul, MN based Chalet Dental Care is taking steps to educate their community on dental veneers and every detail they should know before pursuing this procedure. The clinic also encourages all interested parties to do their own research in addition to consulting with their dentist.

Dental veneers are placed over a patient?s teeth in order to improve their appearance. They are fast becoming one of the most popular devices used to enhance a smile, due in part to their effectiveness in reshaping and modifying teeth. This is important as teeth are one of the most prominent symbols of physical beauty. As such, veneers can help boost a person?s confidence. As part of their efforts to help their community learn about veneers and the many aspects to consider before getting them, Chalet Dental Care has published an informative post on their website.

According to the post, there are two main types of veneers: dental porcelain and composite veneers. Each type has a slightly different purpose, so it is important to consult with a dentist before deciding which one to

get to avoid wasting time and money. Despite their differences, however, the two types of veneers share many benefits that make them great options for those who wish to improve their smile.

For instance, veneers realign teeth while integrating with the patient?s natural teeth, and they are not painful to fit and wear. Before attaching veneers, dentists study each patients? teeth to ensure that the veneers will fit perfectly. The attachment process itself only takes a few minutes, after which the patient will have veneers that conveniently fit their teeth. This sense of comfort is important as veneers may have to be worn for a fairly lengthy period. Veneers are also inexpensive despite the great value that they add to the appearance of an individual?s teeth.

Although veneers are great devices, they are not for everyone. There are certain details to pay attention to before choosing to opt for veneers. The first thing to consider is the patient?s dental situation. Veneers are great for improving the appearance of teeth, but they are not helpful for solving serious dental conditions (such as infections and tooth decay). Next, patients should consider how long the veneers need to be worn. There are veneers that can be worn on a temporary basis, but some require a bit more time. Veneers cannot be removed easily either, and they are known to be harder to remove than attach. Those who wish to have their veneers removed will need to go to a dentist. The full post on veneers can be found at the following link: https://dentiststpaulmn.com/things-you-should-know-before-getting-veneers/.

Those who wish to get veneers should go to a reliable and professional dental service, such as Chalet Dental Care. The dentists at Chalet Dental Care take great care in listening to their patients? situations, making assessments and applying the veneers in a swift and efficient manner. This ensures that their patients will get the best results possible for their teeth. The clinic?s ability to work with patients to achieve a successful outcome has also earned them high praise on several platforms.

For instance, Tricia Tempel says in a 5-Star Google review, ?My entire family loves going to Chalet Dental Care, and that includes my 10-year old son and 7-year old daughter. People think I?m crazy when I say my kids look forward to going to the dentist and even pout that they only get to go two times a year. The entire staff is welcoming, friendly and extremely knowledgeable, and they go above and beyond to make you feel comfortable before, during and after the appointment. When dental offices were shut down in early 2020 due to the pandemic, Chalet Dental researched and attained the equipment, supplies and plans necessary to keep their patients and staff safe once they reopened. I?ve been to their office twice during the pandemic and felt very safe during each visit. While there are plenty of dental offices near our home, we choose to drive the 30-minute commute because we cannot imagine better dental care for our family than Chalet Dental.?

Parents and other members of the community looking for a top-quality St. Paul dentist are welcome to visit

the Chalet Dental Care website to learn more about their services. Dr. Brent Fredrickson of Chalet Dental Care may be reached for further details as well.
