

Cool Roofs Inc. Expands Residential and Commercial Roofing Services to Include Schertz Texas

September 13, 2021

New Braunfels, Texas - September 13, 2021 -
New Braunfels Roofing - Cool Roofs Inc., a roofing contractor based in New Braunfels, TX, is happy to announce that they are expanding their residential and commercial roofing services to include Schertz, Texas. Schertz is located within the San Antonio-New Braunfels metropolitan area and had a population of 42,042 as of the 2019 US Census estimate. This city has experienced significant growth since the late 1990s, which means that it is an important market for roofing services.

Colt Moncla, owner of Cool Roofs Inc., says, ?The roof of your business or home serves as a protective shield from the elements for the things that matter to you most, but only if it is in good shape. In the case it deteriorates, your roof starts to leak, you know it?s time to have it replaced. To ensure that you are getting the best service, we are a full-service roofing contractor in Schertz Texas. We are proud of all of our work and guarantee quality. Whether you need a new roof or repairs, we are the roofing company to call.?

They also repair, replacement, or installation services for residential roofs in Schertz. They can handle a

broad range of roofing materials, including slate roofs, shingles, metal roofs, and tile roofs. And there are several factors that make them the leading provider of roofing services. These include their: free roofing project estimates; use of high quality roofing products; professional expertise; and meticulous and high quality roofing installation.

They assure homeowners and other property owners that every roofing product they install comply with the highest standards of quality, craftsmanship, and durability, which ensures that the home will be protected from the various elements. In addition, their roofing professionals have all been ensured to be fully insured, bonded, and licensed.

So far, Cool Roofs has earned more than 130 five-star reviews on Google and it has a perfect overall rating of 5.0 stars. Linda A. gave them five stars and said, ?We have 2 duplexes that needed new roofing, patio roof repairs and rotten wood replaced. I also had a few other additional items that I wanted taken care of. Cool Roofs Inc came in and absolutely solved all our problems. Jay Evans is a great guy and a man of his word. His team did a great job on all issues, they stripped all the old shingles and felt, replaced the rotten wood and painted primer on it and cleaned up all the mess they made. They took care of all the issues I had. Jay came to give us a bid, we had 2 new roofs within a week?.?

Cool Roofs offers a commercial roofing product line that includes: thermoplastic polyolefin (TPO), roof coatings, spray foam roofing, and metal roofing. TPO is a roofing material that is frequently found in commercial buildings. It has strong resistance to ozone, ultraviolet radiation, and chemical exposure, which means that it is a suitable commercial roofing material. It will keep the temperature of the roof low, thus decreasing energy costs especially during peak months. And because it does not require tear-off, daily business operations will not be interrupted while the roof is being serviced.

Roof coatings are also for protecting and extending the life of the roof. They can protect the roof from the weather and various elements. The quality and volume of the resins that were used in producing the roof coatings provide them with the right elasticity that make them suitable as roof coating.

Spray foam roofing provides a completely waterproof, seamless, and adhering roofing material that can protect the current roof substrate. It is less costly while having higher durability and having a better tensile strength, compared to a multi-layered built-up roof system.

Meanwhile, metal roofing needs only minimal maintenance, but there are times when it will have to be replaced. They will also be utilizing high quality materials for the metal roof panels. Metal roofs offer the benefit of being energy efficient, requires very little maintenance, and lightweight.

People who require commercial and residential roofing services can visit the Cool Roofs Inc. website, or contact them on the telephone or through email. They are open from 9:01 am to 4:00 pm, from Monday to Friday.
