

AskDaveTaylor Offers Honest Assessments Of Consumer Electronics

August 24, 2021

August 24, 2021 -
AskDaveTaylor, a fast growing YouTube channel, would like to reach out to those who may be in search of a source of honest, unbiased assessments of products. AskDaveTaylor is dedicated to examining the advantages and drawbacks of various consumer electronics and tech gadgets. The channel releases videos weekly talking about a range of products, including phones, earbuds, computer peripherals and other appliances. The channel?s videos talk about every aspect of each electronic device, offering a thorough assessment. With dozens of videos dating back to at least four years ago, AskDaveTaylor has been on YouTube for a while, and channel lead Dave Taylor is an expert in all things electronics.

?If you're wondering about the best tech gadgets, audio gear and devices,? says the channel, ?you can trust Dave's years of consumer electronics industry experience (including being an Innovations Award judge at the Consumer Electronics Show year after year) to help you make the right purchase decision in his honest and entertaining videos. Go ahead, subscribe, there are always interesting new product reviews at AskDaveTaylor!?

The channel has been on YouTube almost since the platform launched. Dave Taylor joined the video hosting

platform in 2007 and has managed to amass over 9 million views over the years. Taylor himself has been in the computer industry since 1980 and has been online since before the internet became a household name. He is considered one of the pioneers of the internet, having contributed to making it the massive source of information and communication tool it is today. His knowledge of electronics is what allows him to produce reliable, trustworthy reviews of all kinds of products.

The videos cover a number of different types of products. Recently, the channel reviewed the QUESTYLE M12 Mobile Hi Fi Headphone Amp, the Google Pixel a week before that and a webcam the week prior. The channel promises new and exciting content every week in addition to being highly informative and useful. Whatever product one might be looking into buying, Taylor has made a video on it or is in the process of making said video.

Taylor also holds a number of qualifications that make him the best choice for anyone looking for a source of accurate information regarding electronics. His credentials include a Bachelor?s Degree in Computer Science from the University of California, San Diego, a Master?s in Education from Purdue University and a Master?s in Business Administration from University of Baltimore, Merrick School of Business. He teaches both undergrad and graduate classes at the University of Denver.

?On the business side, I have created and launched four Internet related startups, the first of which was The Internet Mall,? says Taylor. ?The original one. Long since vanished into obscurity, of course, but I was definitely part of the dot-com bubble and in addition to my own startups, I served on the board of a number of different small companies (and continue to do so today) and have worked with various investment and venture capital firms as a due diligence analyst and even an entrepreneur in residence. In parallel, I learned to write, and write I did. 22 books. Thousands of magazine and newspaper articles. Today, I continue to write both online and off, including a popular monthly column for the Boulder Daily Camera. I might have a book development going on behind the scenes, but nothing to announce. I do contribute forewords or introductions for a few books a year. If you?re looking for someone to write a foreword for your new book, please drop me a note!?

In addition to his vast knowledge regarding electronics, he is an award winning public speaker and can be found at all kinds of conferences, talks and panels including online events conducted via Zoom and other similar platforms. He spends his time offering tech support and advice through his site and producing consumer electronics reviews on his YouTube channel. Visit AskDaveTaylor on YouTube for highly informative reviews of a range of products or visit Taylor?s site for reliable advice and information regarding electronics.
