Philadelphia Tree Service Experts Removes Tree to Protect Homeowner from Constant Floor Repairs

August 20, 2021

August 20, 2021 -
Philadelphia, Pennsylvania ? When Jacob invited Philadelphia Tree Service Experts to his home to handle tree trimming, he had no idea that he would end up removing his entire tree.

?The idea for tree removal was brought up by one of the professionals,? said Jacob, ?That is when I mentioned that I kept seeing cracks on my concrete floor and I couldn?t understand what was happening. When the professionals took a look at the floor, they immediately realized that the tree?s roots were the reason my floor was suffering from the continuous cracks ? the roots were creeping under the floor and costing me thousands of dollars in repairs every year. This is when I decided to have the tree removed.?

?While trees do have value,? said Philadelphia Tree Service Experts chief of field operations, ?Sometimes they may not be worth keeping around, especially if they are costing you a lot of money. In the case of Jacob, while the tree was offering shade in the summer, his floor was always damaged. Removing the tree helped him avoid the costly home repair procedures.?

A top-rated tree removal company Philadelphia, Philadelphia Tree Service Experts removed the tree and also the entire tree stump together with the roots. Operating carefully and using its modern tools, Philadelphia Tree Service Experts managed to bring the tree down without harming the house standing just next to it. The tree service company also cleaned up after the service, leaving Jacob?s landscape looking better than they had found it.

?We do not just handle tree removal,? said one of the company?s professionals, ?In fact, tree removal is generally our last solution. Other services that our customers enjoy include tree trimming, tree pruning, and emergency tree service Philadelphia.?

Philadelphia Tree Service Experts reports that its tree trimming team Philadelphia helps homeowners

improve the aesthetic appeal of their properties. ?It is important that homeowners understand the difference between tree pruning and tree trimming,? said the company?s chief of staff, ?pruning helps us remove damaged, diseased, and branches showing signs of ill-growth. Tree trimming, on the other hand, is used to improve the appearance of a tree ? it shapes the tree crown, giving a tree an apperance that complements its surroundings.?
