

New Braunfels Roofing - Cool Roofs Inc. Accepted Into Certain Teed SureStart

September 16, 2021

New Braunfels, Texas - September 16, 2021 -
TX-based New Braunfels Roofing - Cool Roofs Inc. is pleased to announce that they have been accepted into CertainTeed's highly coveted program CertainTeed SureStart Plus 3-Star & 4-Star Shingle Master. The company has built their reputation on providing domestic and commercial roofing needs of their community and is pleased to be able to provide an even higher standard of quality to its clientele from now on. Learn more here: Cool Roofs TX.

The CertainTeed company offers the SureStart program based on the type of CertainTeed shingles a roofing contractor chooses during the planning process. At present, the Integrity Roof System?s shingles come with one of three available warranty plans. Each plan has a number (indicated in stars) after the name, and the number represents an ascending level of coverage. Cool Roofs Inc. now offers Level 3 and 4 plans thanks to their new membership in the CertainTeed Program. At Level 3 of the SureStart Plus 3 plan, the notable benefits include a warranty effective for 20 years, non-prorated coverage for replacement of both materials and labor costs and also removal of old shingles before replacement. The SureStart Plus 4 warranty plan has the same benefits as Level 3, with a few more additions. In Level 4, the length of the warranty is increased to 50 years for single-family, detached homes, and the plan now includes the cost of disposing of old materials.

Colt Moncla of Cool Roofs Inc. states, "Special thanks to Scott Milford from Southern Shingles, who is the distributor for CertainTeed in our area. We would not be where we are nor have the success we have had so far if not for Scott and the team at Southern Shingles." Given that only 3% of roofing companies are accepted into this program, he further adds, "We are beyond proud to be accepted into this elite and highly respected program from CertainTeed."

A damaged roof can allow rainwater and air to find their way inside the home, possibly causing damage to other parts of the home, including the foundation and walls. Moncla says, ?As an Austin, Texas roofing contractor, we understand that the roof is more than just a cover; a roof is an aesthetic and architectural expression of your own personal taste as well as of the property owner?s accomplishments. Our team of roofers has the knowledge, skills, and tools to help you fully realize your vision, be it a rooftop terrace, rock garden, maze, and so on ? whatever you want, we can make it happen.?

The company?s team of roofing professionals has over 300 successful roofing projects (and even more domestic projects) under their belt. Their product line includes thermoplastic polyolefin (TPO), roof coatings, spray foam roofing, and metal roofing. TPO is a very common roofing material for commercial buildings due to its ozone, UV, and chemical resistance. Roof coatings can protect and extend the life of any roof, offering a fairly substantial amount of protection from the elements. The volume and quality of the resin used in the coatings allow it to maintain its elastic properties. Spray foam roofing creates a completely waterproof, seamless, and adhering roofing protection to the existing roofing of a building. It has higher tensile strength and durability at a very affordable and low cost, in contrast to a multi-layered built-up roof system. Metal roofs are a popular choice as well because they are lightweight, have long-term durability, require minimal maintenance, and are energy efficient. Depending on the quality of the material, the longevity of the roof can be greatly extended too.

Cool Roofs Inc. takes great pride in the fact that every roofing product they install can be held to the highest standards of quality, craftsmanship, and durability in order to ensure maximum protection from the elements. The new membership with CertainTeed will contribute to making their services even better than before. All of the roofing professionals are all fully insured, bonded, and go through extensive continuing education. This ensures high-quality workmanship and compliance with top standards of service and safety. The team takes great care in installing a roof (in order to make sure that every inch of the roof is installed and connected in compliance with the local building code). Cool Roofs Inc. also provides free estimates and repairs for all its services. Cool Roofs' goal is to be the #1 roofing company in Texas. They plan on accomplishing this by opening up new markets, hiring sales staff as well as crews and again focusing on the customer experience.

To learn more about Cool Roofs Inc. and its services, customers may visit the company?s official website. The team can also be contacted via phone or email for estimates or inquiries. Additionally, those interested

are welcome to look up Cool Roofs testimonials online for insight on the company?s approach to customer service.
