

Palm Beach Gardens Exterminators Expanding Their Service Area

August 23, 2021

August 23, 2021 - PRESSADVANTAGE -

Best Pest Control of Palm Beach Gardens, a local Broward County exterminator, has announced they are expanding their service area to cover more properties. "We were getting quite a few calls from just outside of our service area, so we decided to meet the demand and expand our service area," the business owner stated.

"We feel it's our obligation and duty to serve the local residents with superior pest control when they need it, so it only seemed right to find some new team members and branch farther outside of Palm Beach Gardens, FL."

The company offers termite, bed bug, rodent and pest control solutions to homes and businesses in the area. They customize the service plans to meet the needs of the individual property.

So residents worried about wasting money on services they don't need should consider calling Best Pest Control of Palm Beach Gardens. No contract is required to use their services and they also offer year-long pest protection solutions.

?If you have a problem with certain pests throughout the year, we can help you stay protected from them,? the manager said. He added, ?Some pests are also worth preventing rather than waiting for an issue to occur, such as termites and rodents. If left unchecked these pests will cause serious, expensive damage to your structure and even belongings. We can help you ensure they never infest your home or business with our superior pest control solutions.?

Some structures are at a higher risk of developing a pest issue, such as those that are close to wooded areas, or those living in close proximity to others. Apartment-living has been known to incur multiple-unit pest infestations because the bugs invade one unit, and then travel to a nearby unit when they begin multiplying. Best Pest Control of Palm Beach Gardens can help apartment residents avoid this horrible scenario.

To schedule an inspection or services with the Broward County company, residents can visit them online at <https://palmbeachgardenspest.com> or call them by phone. The manager also said that people looking to figure out if they have a serious issue on their hands, can call their Palm Beach Garden pest control team and many times they can offer some assistance over the phone. They also provide free estimates for the majority of services offered.
