

## **Acacia Dental Group Explains the Services of the Best Cosmetic Dentist in Canberra**

*August 30, 2021*

August 30, 2021 - PRESSADVANTAGE -

Acacia Dental Group, a dental practice in Phillip, ACT, Australia, wants to point out that cosmetic dentistry, especially when provided by a leading cosmetic dental practitioner in Canberra, offers many benefits for anyone who is dissatisfied with their smile. They want to emphasize that modern cosmetic dentistry can offer help with a broad range of treatments and technologies. The difference between general dentistry and cosmetic dentistry is that a general dentist is focused on providing the basic dental needs of the whole family, while a cosmetic dentist is focused on the aesthetics of the patient's smile. There is a significant overlap in the two fields but patients would prefer to go to the cosmetic dentist when having the best smile is their priority.

Sirisha Yalamanchili, one of the dentists at Acacia Dental Group, says, "Cosmetic dentistry focuses on enhancing the aesthetics of your teeth, including the colour, shape, size, position, and alignment. And, all of that goes towards providing you with the best possible smile. What's more, while not every type of cosmetic dentistry is geared towards improving the functionality of the teeth, many of them do. Cosmetic dentistry is pretty advanced nowadays, with more durable and natural-looking treatments than ever before. So, if you want to smile with confidence, take a look at some of the cosmetic dentistry procedures available to you."

The Acacia Dental Group offers various cosmetic dentistry procedures. These include: CEREC technology, white dental fillings, inlays and overlays, crowns and bridges, teeth whitening, and veneers. When searching for the best cosmetic dentist Canberra residents can check out the Acacia Dental website.

CEREC technology applies computer-aided design in the creation of fixed bridges, veneers, crowns, dental implants and more. CEREC technology has revolutionised the way that restorations are produced. When a patient requires a restoration, the tooth or teeth will be prepared, and a three-dimensional digital scan will be taken using the CEREC machine. The patient will be able to see the images on the screen and completely comprehend the kind of treatment that is needed. The CEREC machine is then utilised to create the restoration right there and then. The dentist will simply need to polish and fit the restoration and the patient has a better smile. The benefits of CEREC technology include: rapid design process, permanent solution, cost-effective treatment, long-lasting treatment, natural looking teeth, and high accuracy.

A commonly used cosmetic dentistry treatment is teeth whitening. The teeth whitening treatment does not totally change the colour of the teeth and make them unnaturally bright. Instead, it simply lightens them, resulting in more natural-looking teeth. Teeth whitening provides several benefits: removal of stains; the fact that it can work on everyone; cost-effective treatment; provision of fast results; and comfortable treatment.

The dentists at Acacia Dental will perform a bleaching analysis to determine the best way to lighten the patient's teeth. They will also provide the patient with a complimentary Zoom whitening teeth to allow each individual to maintain his or her beautiful smile for a longer period.

Zoom kits offer a convenient and safe way to make a person's teeth noticeably whiter in one to two weeks. Before the patient goes home, the dentist provides advice to ensure that the patient is fully armed with the knowledge to effectively and safely whiten the teeth at home.

And for teeth that are crooked, chipped, stained, or misaligned, porcelain veneers can be used. These are thin shells made of porcelain that are constructed in such a way that they fit the front of the patient's teeth. They are then bonded with the surface of the tooth to hold them firmly in position, offering a simple way to improve a person's smile.

Acacia Dental Group offers a free consultation for first-time patients. The first-time visit typically includes a routine checkup and clean.
