Albuquerque, New Mexico ? Using its 25+ years of experience with trees, Albuquerque Tree Experts is helping property owners make the right choices with trees standing on their landscapes. Recently, the 5-star tree maintenance company has advised a homeowner to remove a tree to avoid spending thousands of dollars on property repairs.

?He had invited our tree trimming team Albuquerque to help him shape his trees,? said Albuquerque Tree Experts CEO. ?However, during tree trimming, one of our professionals noticed something peculiar about a tree that was standing next to the customer?s house. After examining it more closely, the professional determined that the tree was rotting from inside out. With a good push from the wind, the tree would have broken and fallen on the client?s house. Luckily, we caught this risk before the disaster occurred.?

A company that operates in Albuquerque and its suburbs, Albuquerque Tree Experts offers all types of tree care procedures. In suburbs like Sandia Heights, Corrales, Valencia, Rio Rancho, Carnuel, Paradise Hills, and North Valley, the company is known as the best tree pruning company, stump removal company, and tree removal company Albuquerque. The company is also known for its emergency tree service Albuquerque ? the company responds to all emergency tree service requests in under an hour.

?Today we visited the clients home to help him with the removal of the tree,? said the company?s chief of field operations. ?I would like to note that the job was not easy, considering that we had to be extra careful since it was impossible to figure out when or where the tree might break. Therefore, our team had to work extra hard to bring the tree down foot by foot from the crown down to the base. Luckily, we did finish the tree

removal safely.?

Albuquerque Tree Experts notes that inspecting trees every once in a while can help a property owner discover its problems long before it turns into a hazard. ?Our client could have noticed that his trees had some issues if he had inspected his trees,? said the chief of field operations. ?It was by mere luck that our team was there to catch the problem early enough. This is why we advise our clients to check their trees now and then to see if they have developed some abnormalities.?
