

## **Puragain Water Revitalizes Marketing Efforts with Bliss Drive Partnership**

*August 27, 2021*

August 27, 2021 - PRESSADVANTAGE -

Puragain Water, a premier water filtration installation service with locations in San Diego County, Riverside County, Orange County and Los Angeles County, has announced a new partnership with the California-based digital marketing agency, Bliss Drive. Bliss Drive has offices located in Los Angeles and Irvine, CA. With this new partnership, Bliss Drive is seeking to help Puragain Water expand their online visibility and digital marketing efforts.

Puragain Water provides a variety of in-home water purification services. Their team can install water filtration systems or water softeners, perform system and filter maintenance and perform water testing.

The main three water filtration systems offered by Puragain Water are the 5 Stage Reverse Osmosis Drinking System, the 6 Stage Alkaline Drinking Water System and the Whole House Water Conditioner & Alkaline System.

According to the Puragain website, The 5 Stage Reverse Osmosis Drinking System uses reverse osmosis technology to filter out a variety of contaminants like chemicals, lead, pesticides, bacteria and chlorine,

?leaving you with pure, safe water for you and your family.?

The 6 Stage Alkaline Drinking Water System includes the 5 Stage Reverse Osmosis Drinking System and adds an additional step. As can be read in greater detail on the Puragain website, after the 5 stage reverse osmosis process, the water is ?then passed through the mineral cartridge and is enriched with natural microelements such as calcium and magnesium. These beneficial minerals and nutrients are added back (after being removed by RO) to water to create a mineralized, pH-balanced result. These media alkalize and remineralize water, raising its pH, and producing natural calcium and magnesium ions.?

The Whole House Water Conditioner & Alkaline System includes the 6 Stage Alkaline Drinking Water System as well as the 5 Stage Reverse Osmosis Drinking System. According to the Puuragain website, the Whole House System also uses a system containing carbon filters and a second system which utilizes healthy minerals (calcium and magnesium) in a process called Nucleation Assisted Crystallization (NAC). Interested readers can learn more about how the Whole House Filtration System works here.

In addition to these water filtration systems, Puragain Water also offers annual water testing, annual maintenance and free installation with purchase.

Readers interested in contacting Puragain Water can reach them by telephone at 760-317-9741, by email at [aaron@puragainwater.com](mailto:aaron@puragainwater.com), or via their website at <https://www.puragainwater.com/>. They provide water filtration services in San Diego, Riverside, Orange and Los Angeles County.
