Lenexa HVAC Company Blog Discusses Cost Efficiency With a Smart Thermostat

August 31, 2021

Lenexa, Kansas - August 31, 2021 -
Dillon's Heating & Cooling is a Lenexa, KS-based company that likes to do more than just provide outstanding HVAC services. The company also likes to keep its customers informed on the latest trends in heating and cooling that can help them save money. Evidence of that comes in the form of a blog that was recently posted on its website. This blog post talks about how a customer can get better cost efficiency by installing a smart thermostat. The title of this newly posted blog is ?Does a Smart Thermostat Really Save me Money?? and it can be seen here at https://www.dillonsheatingandcooling.com/post/does-a-smart-thermostat-really-save-me-money.

The company owner, Jeff Dillon, says, ?We have always been an HVAC services provider that takes great pride in giving our customers a well-rounded experience when it comes to their heating and cooling needs. That includes giving them tips and suggestions as to how they can save some money on their energy bills. A great example of that is our new blog that goes over how installing a smart thermostat can cut down on home heating and cooling costs. We will continue to post blog articles on our website that will help our customers keep a little more of their hard-earned money in their own pockets.?

In the company?s newly posted blog, it stated that they realize how expensive it can be to keep a Kansas City area home at a comfortable temperature. Some of this expense results because home and business owners either don?t have a smart thermostat or they are not sure how to take full advantage of having one. The blog then went on to discuss how smart thermostats work. Their best feature is they can be programmed to heat or cool a home or business to different temperatures throughout the day. As far as Smart Thermostat's Saving Money, The article stated that the benefit of this is a home or business can be kept at less extreme temperatures when it?s not occupied. This makes smart thermostats very good at reducing heating and cooling costs which often make up 50% of a person or company?s heating and cooling bill. Next, the blog went on to describe what a customer should look for in a smart thermostat. This includes it being energy star compliant, compatible with smart device hubs already in use, and not cost over $300. The new blog ended by stating that the professionals at Dillon's Heating & Cooling are always there to help their customers with any smart thermostat information, installation, or repair needs that they have. More useful blogs such as this one can be seen on this reputable heating and colling company?s website at https://www.dillonsheatingandcooling.com/.

Dillon also talked about the many HVAC services that they offer. This includes a wide variety of residential heating and cooling equipment installation, replacement, repair, and maintenance services. He says that they are also one of the highest-rated commercial HVAC service providers in the Kansas City area. They also work closely with many real estate companies doing heating & cooling tune-ups and they can provide their residential and commercial HVAC customers with comprehensive maintenance agreements to keep their heating and cooling systems in peak operating condition. The company owner added that they offer free estimates for all of their services and they treat their customers like family while doing HVAC work that is always satisfaction guaranteed.

This company?s residential and commercial services are always highly rated by those that have experienced them. Tim G. Stated, ?I found Dillon's through a Google search and decided to use them based on their excellent reviews, and wow they weren't kidding. Dillon's was amazing! I called and spoke with Stephanie who was very polite and helpful and had me scheduled for an appt the same day! The service tech Patrick arrived exactly on time and did a perfect job of diagnosing and fixing the issues I was having with my system.? Sonia Hodgin proclaimed, ?Jeff and his crew, are incredible! I have tons of rental income properties and it isn?t easy. But with HVAC, cooling, or heating, they have me covered. My tenants love them! This company makes me a better landlord and my tenants? happy tenants which makes this a great win-win situation. Late at night, early mornings, no excuses Jeff and the team are there on time, and job well done!? These reviews were taken from Dillon's Heating & Cooling?s Google Maps Business Listing where this company averages a perfect 5 out of a possible 5-stars on over 170 reviews.
