Dumpster Stars Offers Affordable Dumpster Rental in Round Rock TX

September 07, 2021

Hutto, Texas - September 07, 2021 -
Dumpster Stars has announced that they are offering affordable dumpster rental in Round Rock TX. They are ready to help businesses save time and money while minimizing the mess from construction sites, office moves, yard waste cleanups, or full-service clean outs. They offer various sizes of roll-off dumpsters to ensure that clients will be able to find the appropriate size for their project.

A spokesperson for Dumpster Stars says, ?If you need a dumpster rental, we have the right size for your project. We offer roll-off dumpsters for construction and remodeling projects as well as convenient junk removal. Looking to get rid of furniture or appliances? We?ve got you covered, no matter what type of junk you?re looking to get rid of. Dumpster Stars offers roll-off dumpsters for large construction projects and a variety of other sizes for all your needs.?

The available roll-off dumpster sizes from Dumpster Stars are the: 10 yard dumpster, 15 yard dumpster, 20 yard dumpster, and 30 yard dumpster. The 10 yard dumpster can hold up to three pickup truck loads and its common applications include: home projects; small scale dirt removal; typical yard maintenance; and light demolition.

The 15 yard dumpster can hold up to 4.5 pickup truck loads and its typical applications include: garage clean outs; backyard cleanup projects; kitchen or bathroom remodels; and deck removal. The 20 yard dumpster can hold up to 8 pickup truck loads and its usual applications include: roofing projects; large waste removal; major landscaping projects; and basement renovation. The 30 yard dumpster can hold up to 9 pickup truck loads and its common applications include: storm recovery; large clean outs; demolition waste removal; and large tree removal.

Renting a dumpster from Dumpster Stars requires a few simple steps. The first step is to schedule the dumpster rental. Their team of professionals can help the client find the appropriate size of dumpster for the

project. The second step is to prepare for the delivery of the dumpster. It is important to ensure the drop-off area for the dumpster is clear. The third step is to fill the bin up with any acceptable junk or trash. And since the professionals from Dumpster Stars care for the environment, they have a team of experts who are ready to answer the client?s questions and ensure that the waste is disposed of properly. And finally, they will schedule the pickup of the filled dumpster. The client will simply need to text or call Dumpster Stars to schedule the pickup.

The dumpster rental costs will vary, depending on a number of factors. One of the most important considerations is the size of the dumpster and the weight of the trash to be picked up. They can provide an estimate upfront of the costs.

With regards to permits, most customers in the Round Rock area usually don?t have to secure permits for a dumpster rental placement. When a client rents a dumpster, this is typically placed on the property or in the driveway and there is no need to get a permit from any governing body. However, if the dumpster is to be placed on public property, such as parking areas or sidewalks, a permit may need to be secured.

With regards to the trash that can be thrown into a dumpster, common household items, such as clothes, housewares, different personal items are acceptable. Thus, most debris from a home remodel can be thrown into the dumpster, including drywall, flooring, lumber, cabinetry, and siding. Any kind of debris, junk, trash, or rubbish can placed in the dumpster as long as it is not a hazardous material. Hazardous waste includes flammable, toxic, and corrosive substances. Other materials that Round Rock ordinances prohibit from being placed in the trash bins include contaminated soil, cleaning products, items with asbestos, batteries, ink, adhesives, paints or liquid paint strippers that are labeled ?dangerous for environment? or ?flammable? on the label of their containers; infectious waste (such as needles), motor oils or oil filters; tires; gasoline-powered equipment; and refrigerants such as Freon; paints containing lead (or latex paint over any type of metal).
