

Safina Cabinetry Now Offers Custom Cabinets in Nashville

October 05, 2021

October 05, 2021 -
Safina Cabinetry, a company based in St Charles, MO, is happy to announce that their custom cabinetry that were previously available only in the St. Louis area under the brand name of Centorbi, is now available in Nashville, TN. These are the same top-of-the-line cabinets that are custom-made from the best materials using precision craftsmanship that people have been used to in the Centorbi brand. Customers can have various elements customized based on their style and preferences. These have to do with door styles, finishes, organization, and design elements. More about this brand of custom cabinetry can be gleaned from https://www.centorbi.com/.

The Centorbi brand was established in 1995 by Derek Centorbi who works with both commercial and residential clients, such as builders, remodelers, and designers to produce custom cabinets at reasonable prices. They have the Innovations cabinetry line for those who desire cabinets using an antique style with a traditional look or ornate carvings. Their Slimline cabinetry line is for those who prefer the sleek and contemporary style.

Custom cabinets are designed in such a way that they will fit a particular room perfectly. These storage

cabinets are designed and built specifically for installation into a particular area of the home, such as the kitchen or the bedroom. Through custom cabinets, homeowners and other property owners are able to avoid cabinets that are too small or too large for a specific area. They are built in the facilities of the custom cabinetry company and then assembled and installed onsite in the home.

To make sure that the cabinets will fit perfectly into the specific space where they are to be placed, the custom cabinet provider makes measurements in the home before they start designing the cabinets. During the design process, clients can specify certain custom features, such as the door styles, the finishes, organization, and the various design elements. Organization has to do with the various ways to hide various items to avoid a cluttered look. This is especially important in the kitchen and also for closets. The design elements are those little details that contribute to the overall look of the cabinets, adding to their value. More about the Centorbi cabinetry can be gleaned from https://www.houzz.com/pro/centorbi/centorbi-cabinetry.

Centorbi is a leader in the field of cabinetry and a member of The Cabinetmakers Association (CMA), the National Kitchen and Bath Association (NKBA), and the Certified Builders Guild (CBG). For four successive years, Centorbi has been recognized as one of the 100 fastest growing woodworking companies in America by Wood 100 and Wood and Wood Products. In 2009, St. Louis Homes and Lifestyles Magazine bestowed the ?Kitchen of Year? award to one of the Centorbi kitchens. The services they provide include: cabinet refacing, custom bathroom vanities, cabinet installation, custom walk-in closets, kitchen remodeling, and custom kitchen cabinets.

Derek Centorbi learned the importance of true craftsmanship and being passionate about ensuring quality and excellent customer service as he grew up helping his grandfather with his kitchen remodeling business. He also learned that the cabinets ordered from the large manufacturing companies do not really have that quality that people are looking for.

The custom cabinets they provide have received several five-star reviews. For instance, Marsha M., one of their clients, has given them five stars and said, ?I am so happy that I saw the ad in St Louis Magazine. I had searched all over for cabinets and could not find the quality, color and people who were willing to make sure I got what I wanted. The design manager knew what she was doing. Very nice, wealth of information and helpful. Came to my house and went above and beyond with helping me design the perfect cabinets. The cabinets are outstanding and have superior material and design. I will never buy cabinets from Home Depot, Lowe's or any other. Having them made for you is the way to go.?

Those who are interested in learning more about the custom cabinetry now available in Nashvile through Safina Cabinetry can also check out the Centorbi Facebook page at
