Signs for Repair or Replacement of HVAC AC Units is the Subject of a New Dillon's Heating & Cooling Blog

September 20, 2021

Lenexa, Kansas - September 20, 2021 -
Dillon's Heating & Cooling is a highly-rated Lenexa, KS-based HVAC services provider that is known for offering its residential and commercial clients a well-rounded customer experience. Part of that is the company regularly posts blogs on its website that inform its customers how to best keep their HVAC units in optimal working condition. The company?s latest blog post goes over some signs that an AC system sometimes gives that often indicate that repair or replacement is needed.

This new blog article and all of Dillon's Heating & Cooling blogs can be seen on its website at https://www.dillonsheatingandcooling.com/.

The company owner, Jeff Dillon, says, ?Although many consider their HVAC air conditioning unit to be a convenience item, trust me when it?s super-hot outside, they are much more than that. They then become a necessity that you simply don?t want to be without. That?s why we take the time to write blogs that educate our customers on how they can better maintain and make the best use of their home or business's air

conditioning units. Our latest blog discusses some common indicators that tell a customer that they should schedule an AC system inspection with us right away.?

The newly written Dillon's Heating & Cooling blog started by saying that learning the six mentioned signs that an HVAC air conditioning unit needs work can help a customer avoid the aggravation and costs that often accompany larger cooling system repairs. The article first talked about how an AC system that blows hot air when it?s supposed to be cooling can be a sign of trouble. Also mentioned, was that condensation and the presence of leaks around an outside air conditioning unit should be taken as a warning there may be a problem with the system. Strange smells when an AC unit is running can also spell trouble. This includes burnt electrical, Sulphur-like, or mold odors. It was also stated that HVAC air conditioning units typically run quietly, so loud or unusual noises when the system is running need to be checked out. Other signs that an AC system may need repair or replacement include the presence of high humidity in a home or business during the warmer months and much higher than normal cooling season electric bills.

Readers that are interested in getting all of the helpful information that this newly posted blog has to offer can read the full version here at https://www.dillonsheatingandcooling.com/post/signs-your-ac-is-about-to-break-or-needs-maintenance.

Whether they are repairing or replacing HVAC units, Dillon's Heating & Cooling customers have nothing but good things to say about the services the company provided for them. Brianna Schumacher stated, ?Bo was quick to arrive and just as quick in identifying the issue with my HVAC and then installing the part on the same day! Thank you, Jeff and team, for getting me taken care of not only after-hours but in less than 12 hours' time! I highly recommend Dillon?s Heating & Cooling.? Shelby Ising wrote, ?Genuine and reliable company. They were very prompt with responses, featured upfront pricing, and explained everything in detail. They made sure I understood all of my options and helped me find a new HVAC solution that was right for my home and my budget. Highly recommend Dillon?s for any HVAC needs, will continue to use their services in the future.? These reviews came from the company?s Google Maps Business Listing where they boast an impressive 5 out of a possible 5-star rating on the over 180 reviews that have been left there.

Dillon went on to say that they specialize in a wide variety of heating and cooling services. This includes the repair, installation, replacement, and maintenance of both residential and commercial HVAC systems. They also offer emergency heating & cooling repair service, convenient HVAC system maintenance plans, and free estimates for any work that needs to be done. He stated that they will help those in Lenexa, Overland Park, or anywhere else in the Kansas City area with any HVAC needs that they may have.
