EPS Landscaping & Tree Service Gives Advice on Commercial Landscaping in Pembroke Pines, FL

September 20, 2021

Pembroke Pines, Florida - September 20, 2021 - PRESSADVANTAGE -

Pembroke Pines, Florida-based EPS Landscaping & Tree Service is a company that likes to provide its residential and commercial clients with a well-rounded customer experience. This includes going above and beyond just doing quality landscaping and tree work by doing such things as giving its customers information that will help them make sound landscaping choices. The latest example of this is a recent blog that this reputable Broward County area landscaping and tree services provider uploaded to its website for its commercial clients. This newly posted article is titled ?Common Commercial Landscaping Mistakes to Avoid in Pembroke Pines?.

Greg O'Connell, who co-owns the company along with his wife, says, ?With as many years as we have been providing quality landscaping services to commercial businesses in our area, we could not help notice some concerning landscaping trends that seem to happen over and over again. That?s why we decided to take the time to write and publish our latest blog. It will help our commercial customers and other business owners avoid some of the common pitfalls that we have noticed when it comes to commercial landscaping in our area of Florida.?

The new blog starts by stating that there are many ways that a Pembroke Pines area business can take advantage of the large variety of greenery and other plants and trees that thrive in Southeastern Florida but there are important considerations to get this done right. One important area the blog mentioned that is often overlooked when it comes to business landscapes is security. This includes placing trees, plants, and bushes where they may obscure the view of important security cameras. The blog noted that it?s also important to keep safety in mind at all times when adding features to any commercial landscape. It gave as an example that irrigation systems can help keep any business lawn looking great but can also become a safety hazard if they put too much moisture down on the sidewalks and pathways that are frequently traveled by employees and customers. This new EPS Landscaping & Tree Service blog also emphasized that any commercial landscaping plan should never be rushed and needs to take into consideration security, safety, lighting, as well as being designed to look good.

O?Connell reminded that they at EPS Landscaping & Tree Service are always available to help both their commercial and residential landscaping customers make sound decisions regarding the upkeep of their outside areas. They can also provide them with a wide variety of landscape design, installation, irrigation, and maintenance services. This includes helping them to create picture-perfect commercial landscapes, poolscapes, outdoor living spaces, and water features. Some of their lawn maintenance specialties include lawn mowing, edging, plant bed refreshing, and fertilization. He stated that they also provide such essential tree services as tree planting, tree trimming, and tree & stump removal. The company owner mentioned that both their commercial and residential clients can also take advantage of the many EPS Landscaping & Tree Service yard maintenance plans that they offer. These provide cost savings because they bundle together several important tree and landscaping services.

Customers that have used this company?s landscaping and tree services often rave about the service they were provided with. D Soto stated, ?Best landscaping company I have ever come across - hands down! The owners are extremely responsive and have the best customer service! If you are looking for a landscaping company these folks are it! Thank you, Greg and Jessica, for such wonderful service week after week. It truly is a pleasure doing business with you guys!? Bryan Cook proclaimed in his 5-star review, ?When I called this company they came out and exceeded my expectations. I have recommended EPS to all of my friends. They are a one-stop shop to meet all of your landscaping needs.?
