

# Steadfast Tree Care Fredericksburg Gets Another Five Star Review for Tree Trimming Services

*September 22, 2021*

September 22, 2021 -
Steadfast Tree Care Fredericksburg is proud to announce that they have received another five-star review and this came from a customer who requested tree trimming services. The company offers tree removal and tree trimming services in Fredericksburg, VA, and neighboring areas. They currently have an overall rating of 4.9 out of 5 stars on Google.

Meanwhile, they want to point out that people tend to take trees for granted because most of the time they don?t need watering, except when they were still young. However, they will still need some trimming or pruning for a number of reasons. These reasons include when: tree limbs and branches have become an obstruction; something is dangerous to the health of a tree; trees appear overgrown; and the tree has become a risk to property and people because certain limbs and branches have become too heavy.

In the customer review, Gonzalo T. gave them a five-star rating and said, ?Highly recommended! We've used them twice now for tree trimming ? very quick and professional.?

Phillip Wood, a representative for Steadfast Tree Care, says, ?We?re both happy and proud to have received another five-star review for our tree trimming services. This is great feedback because it tells us that our efforts to provide the best service have been paying off. Rest assured that we will continue to do our best for any tree work required by our customers.?

Technically, it is possible for homeowners and other property owners to trim trees on their own if they have the tools. However, even with the appropriate pruning or trimming tools, most people will not be able to do the trimming or pruning in a more thorough and safer way than arborists and tree professionals who have the necessary training, experience, and knowledge.

?We would like to stress that if you're not planning to have the trees on your property pruned on a regular basis, you may be opening yourself up to some risk,? says Phillip Wood. ?Most experts recommend a tree inspection every 3-5 years ? this way, trained, certified, and licensed professionals can assess the health and safety of your trees, decide when they need to be pruned, and if needed, handle the process of trimming right then and there.?

Steadfast Tree Care applies tried and tested pruning and trimming methods that ensure the trees remain healthy. Some of these techniques are: crown raising or raising a tree canopy by getting rid of limbs from lower part of the tree to offer clearance for buildings, pedestrians, and vehicles; crown cleaning that involves the removal of branches and limbs that may be dying or diseased; crown reduction to help decrease the size of the tree while ensuring that it remains structurally sound; and tree thinning to allow more light and air through the tree?s crown.

Meanwhile, they also want to stress why it is so important for homeowners and other property owners who need to have a tree removed to hire a professional tree removal service. First of all, tree professionals are knowledgeable, experienced and trained on proven tree removal procedures. Cutting down a tree and bringing it down improperly can cause damage to property, vehicles, including the property of a neighbor. It may also cause people to be injured. And it may result into tens of thousands of dollars of liability for the owner.

Second, tree professionals will be able to properly evaluate the situation and determine the best way to bring down the tree safely. Third, a professional tree company can always provide emergency services, for instance, after a storm has severely damaged or felled a tree and this requires removal and cleanup. And finally, a dependable tree contractor will always strive to perform the whole job, including stump removal and cleanup.

People who would like to learn more about the Fredericksburg tree service company can visit the Steadfast Tree Care Fredericksburg website, or contact them on the phone or through email. They are open from 8:00 am to 6:00 pm, from Monday to Saturday.
